CULTURE OF CONFIDENCE

Count on us for a complete diagnostic solution for better patient outcomes and reduced costs

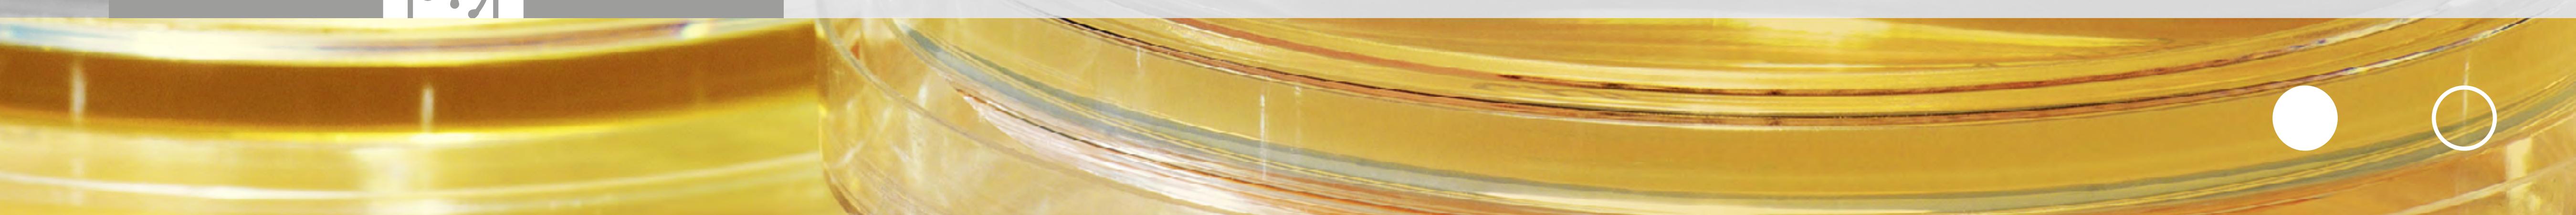

World leader in microbiology

- Over 50 years experience
- Solutions recognized by the international scientific community
- Products tested and approved worldwide

bioMérieux: A partner that cares

- A full range of services behind each medium
- Constant innovation: over 20 different chromogenic media
- Six culture media only available from bioMérieux:
NTM Elite agar*, CHROMID® Colistin R, CHROMID® Vibrio,
CHROMID® OXA-48, CASA™, CHROMID® P. aeruginosa.

CULTURE OF CONFIDENCE

How we care more

We offer solutions for:

- Screening of resistance carriers in healthcare settings
- Early identification of antimicrobial resistance to preserve antibiotics for future generations
- Monitoring of cystic fibrosis patients and chronic pulmonary diseases
- Management of gastrointestinal infections
- Faster sorting urine specimens thanks to WASPLAB® & PhenoMATRIX™

CULTURE OF QUALITY

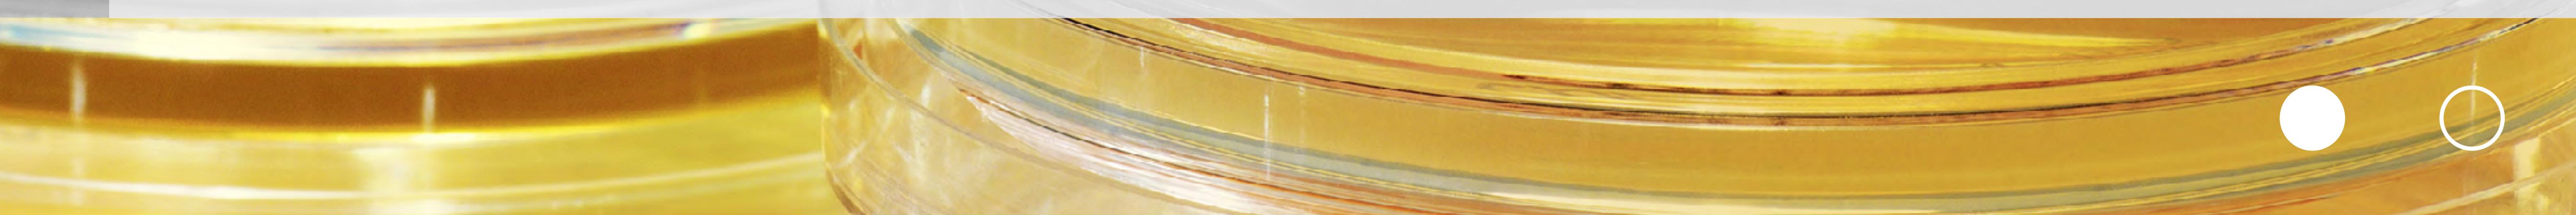

Guaranteeing consistent product quality, user and patient safety, and limited environmental impact

Dedicated Quality Control experts at 5 production sites

Quality Control certificate for each product batch:

- Traceability throughout the production process
- Inter-lot reproducibility

- Thermal Shock Statement guarantees culture media stability in real-life situations 1 to 4 weeks at 15-25 °C
- Clinical evaluation trials provide routine use performance indicators to support all product claims
- Product use in customer routine with the maximum of practicality

CULTURE OF QUALITY

Guaranteeing consistent product quality, user and patient safety, and limited environmental impact

- **ISO 9001: 2015 & ISO 13485: 2016** certifications leading to the Global Quality Management System Manual
- **ISO 14971: 2007** leading to the Safety Risk Management of bioMerieux Products
- **EN ISO 23640: 2015** certification leading to the Stability testing and Thermal Shock Statement
- **EN 13612: 2002** leading to Corporate Procedure to Conduct Clinical Trials
- **IEC 62366-1: 2015** leading to Usability Engineering Process

CULTURE OF SERVICE

Making your daily life easier

Listening to your needs

- Centralization of customer feed-back for continuous improvement
- Development of new-generation media
- Lab Consultancy expertise to enhance lab productivity

Helping you meet accreditation requirements

- Validated Certificates of Compatibility
- On-line Technical Library

A worldwide presence to be closer to you

- Local network of specialists
- Local training, «Education days» and on line training videos: culture media tutorials.
- Facilitating logistics of culture media supply

CULTURE OF INNOVATION

Anticipating your new challenges in ID/AST

- Pioneer in chromogenic media since 1990: hundreds of patents submitted in 166 files
- Over 10 new culture media products developed in the past 10 years
- A research and Development site entirely dedicated to Culture Media design
- Integration of new algorithm technologies on WASPLab® empowered by bioMérieux and PhenoMATRIX™ software
- Guarantee of raw material perennity and constant identification of improvement opportunities
 - Agar source, replacement of hazardous raw material
 - Development of specific pathology media, e.g. NTM Elite & CHROMID® S. aureus Elite for respiratory samples from Cystic Fibrosis patients and chronic pulmonary diseases
 - CHROMID® Colistin R for the screening and confirmation of colistin resistance in Gram negative *Enterobacteriales*

CHROMID® range⁽¹⁾

The most extensive range of chromogenic media for the simultaneous culture and identification of micro-organisms

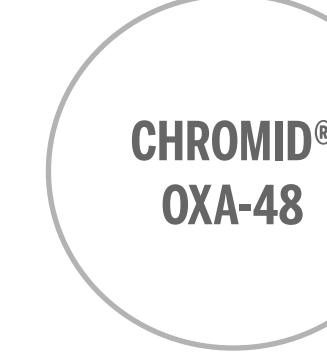

Easy to use and read

- Specific and intense coloration for clear identification
- Improved detection of mixed cultures
- Limited training needed

Quicker, reliable results for better patient treatment

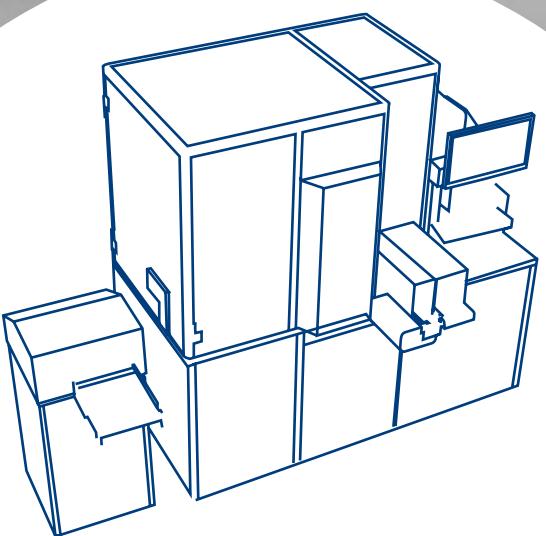

- Identification in 18 or 24 hours
- Less need for confirmation testing

Improved workflow

CHROMID® CARBA agar

Screening of carbapenemase producing *Enterobacterales*
in 18-24 hours on clinical specimens - stools or rectal swabs.⁽⁴⁾

K.pneumoniae 1 - *E.coli* 2
18 hours

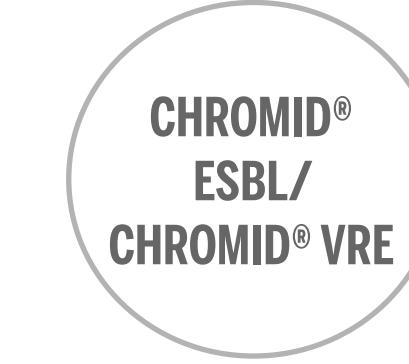

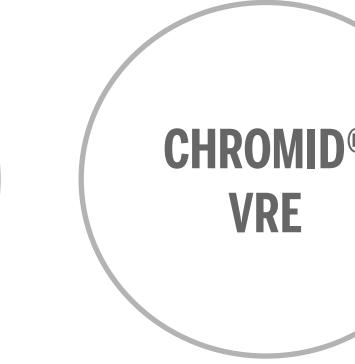

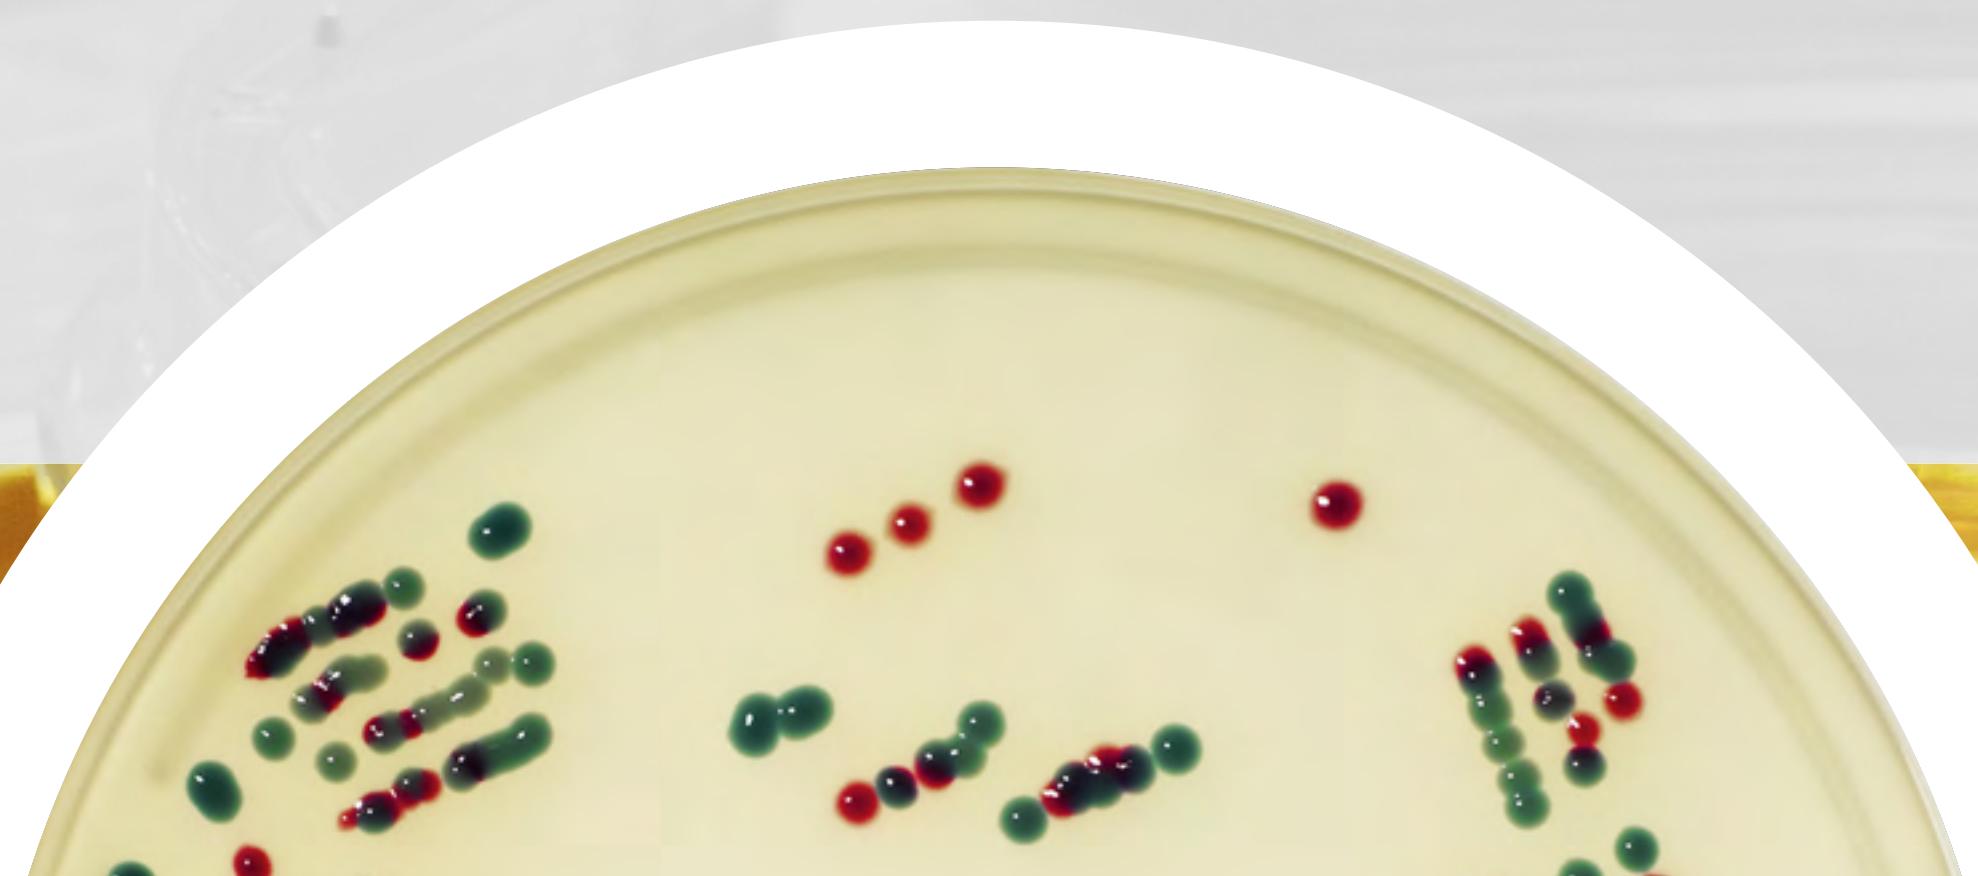

CHROMID® CARBA agar

- Direct and or presumptive identification of *Enterobacterales* species
- Global solution for Resistance identification thanks to RAPIDEC® CARBA NP compatibility
- Formulation FDA cleared

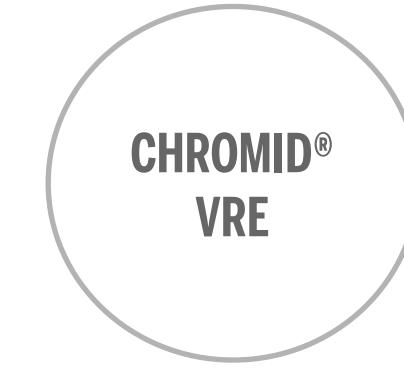

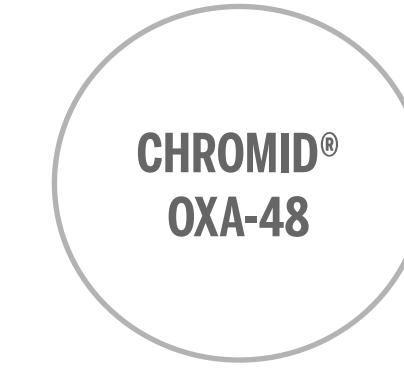

For more information, consult the instructions for use.

CHROMID® Colistin R agar

Screening of Gram-negative bacteria with colistin resistance
in 18-24 hours on clinical and veterinary samples.⁽⁵⁾

K.pneumoniae ① - *E.coli* ②
24 hours

CHROMID® Colistin R agar

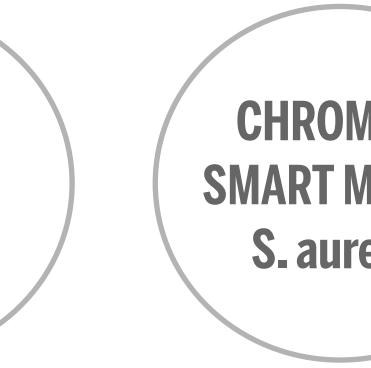

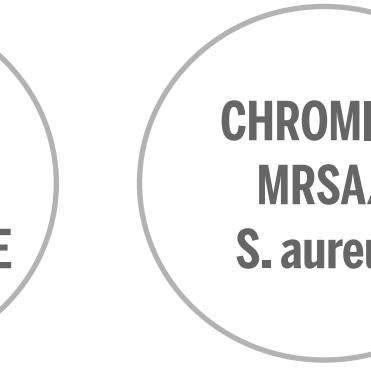

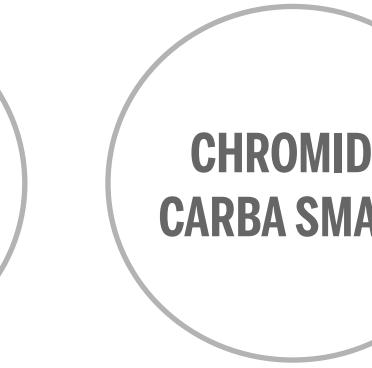

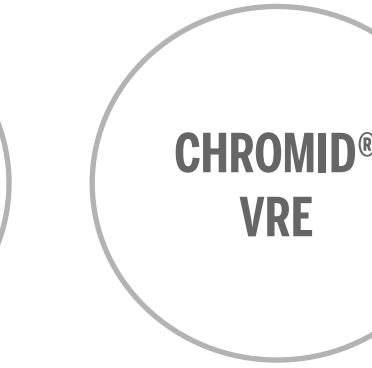

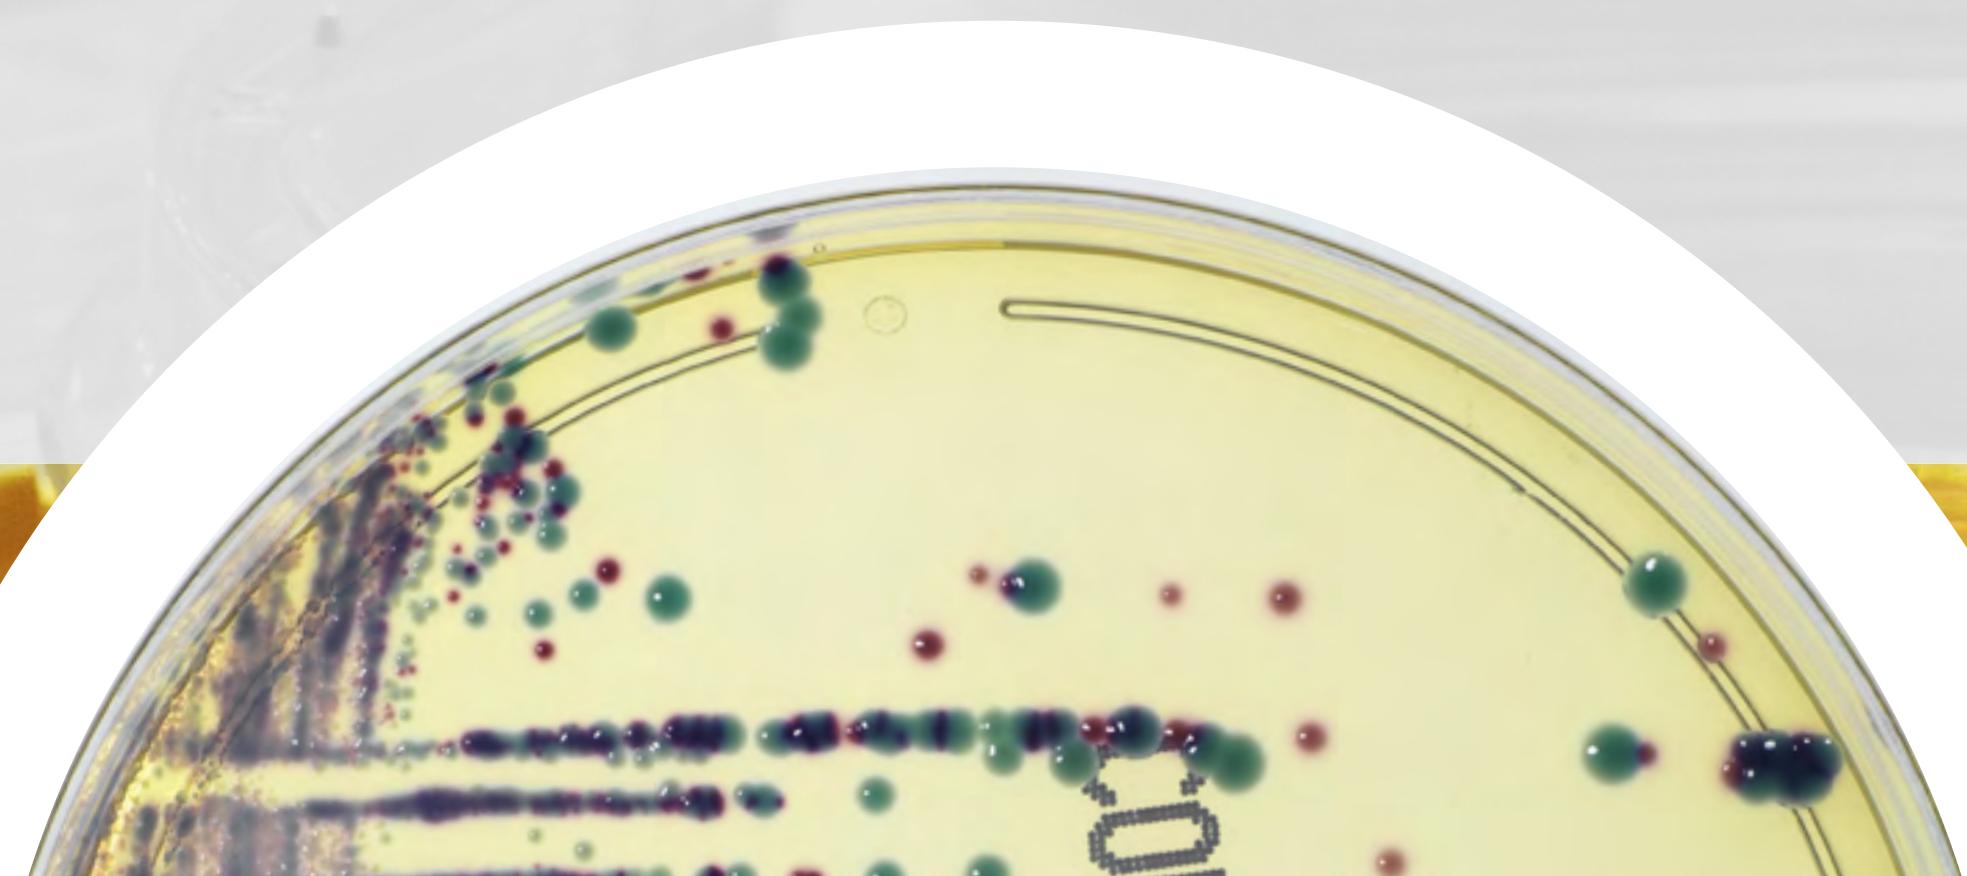

Two claims:

- Screening of colistin R *Enterobacterales*
- Qualitative resistance detection to colistin from isolated colonies: alternative method to broth micro dilution method

Optimized protocol for less confirmatory tests

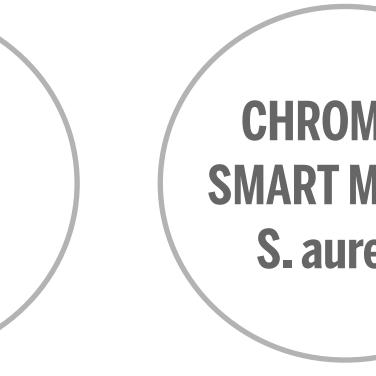

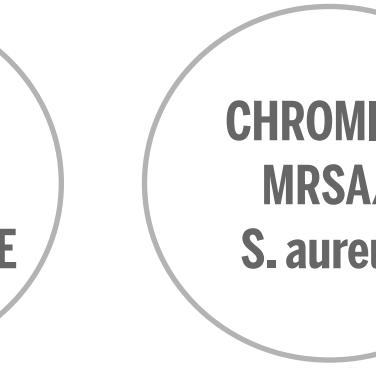

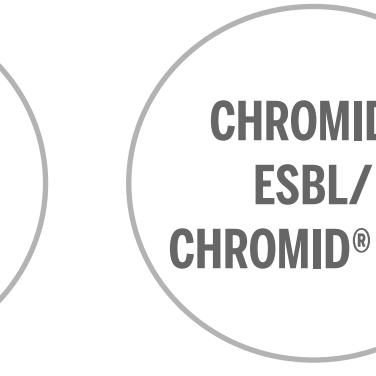

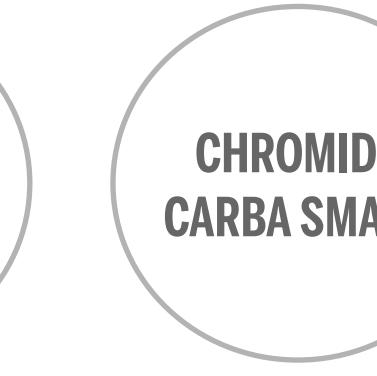

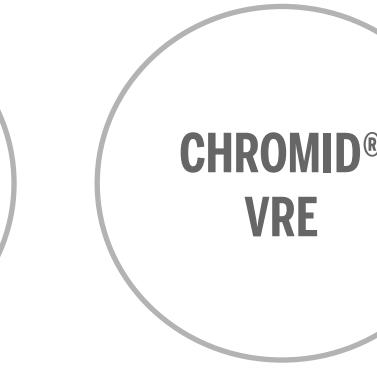

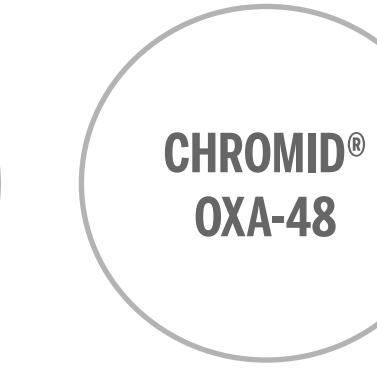

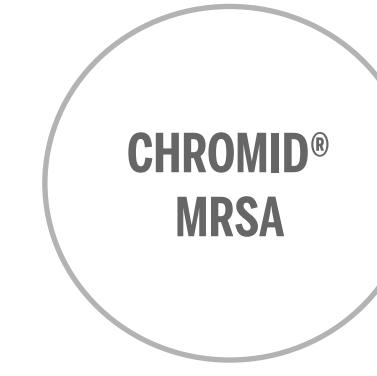

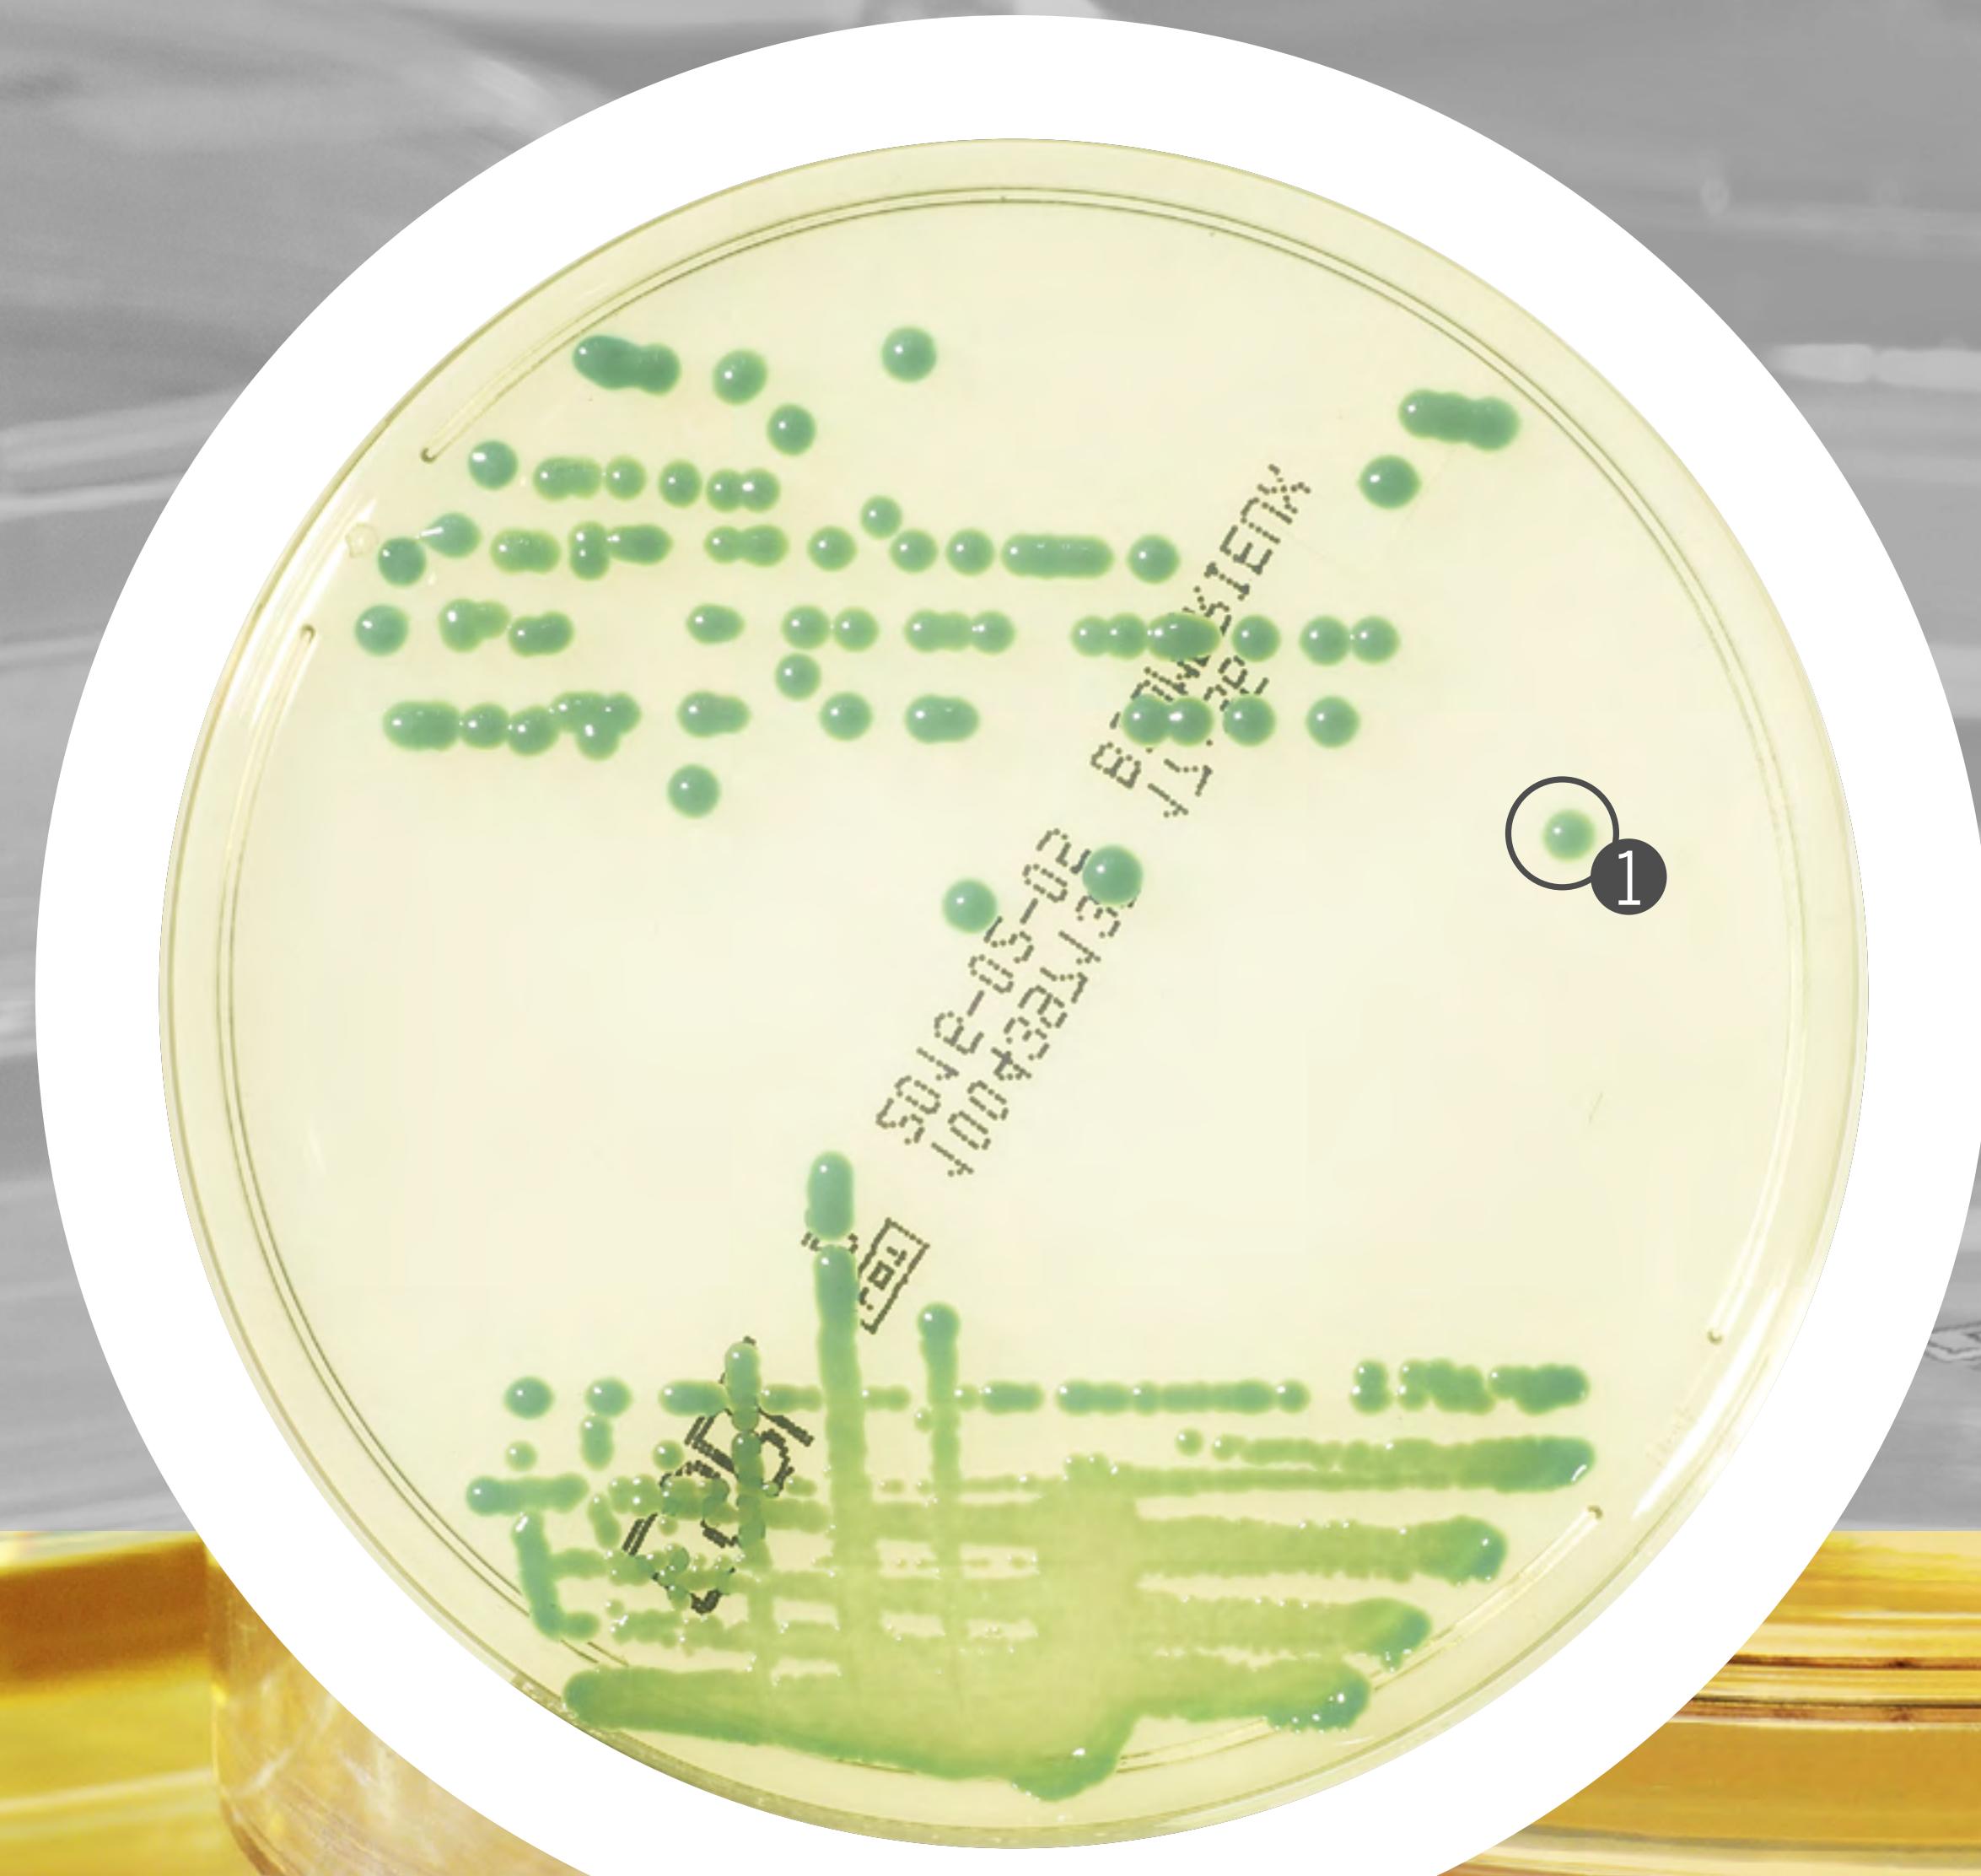

For more information, consult the instructions for use.

CHROMID® ESBL agar

Screening of ESBL producing *Enterobacterales* in 18-24 hours on clinical specimens - rectal swabs, urines and respiratory specimens.⁽⁷⁾

K.pneumoniae ①
18 hours

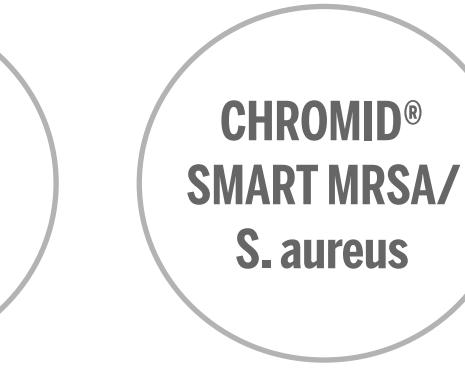

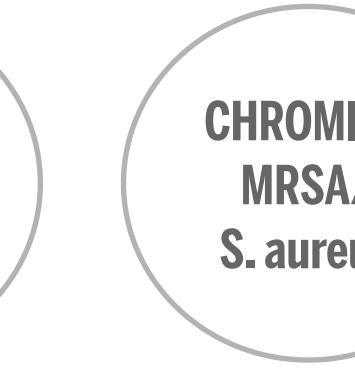

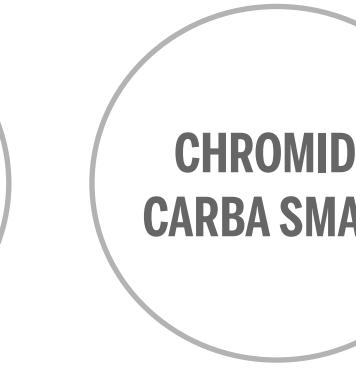

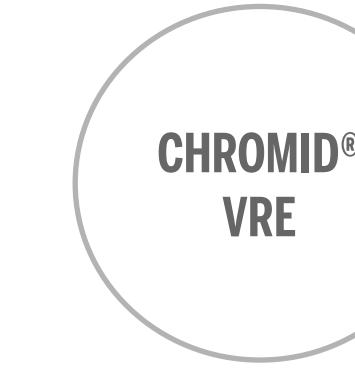

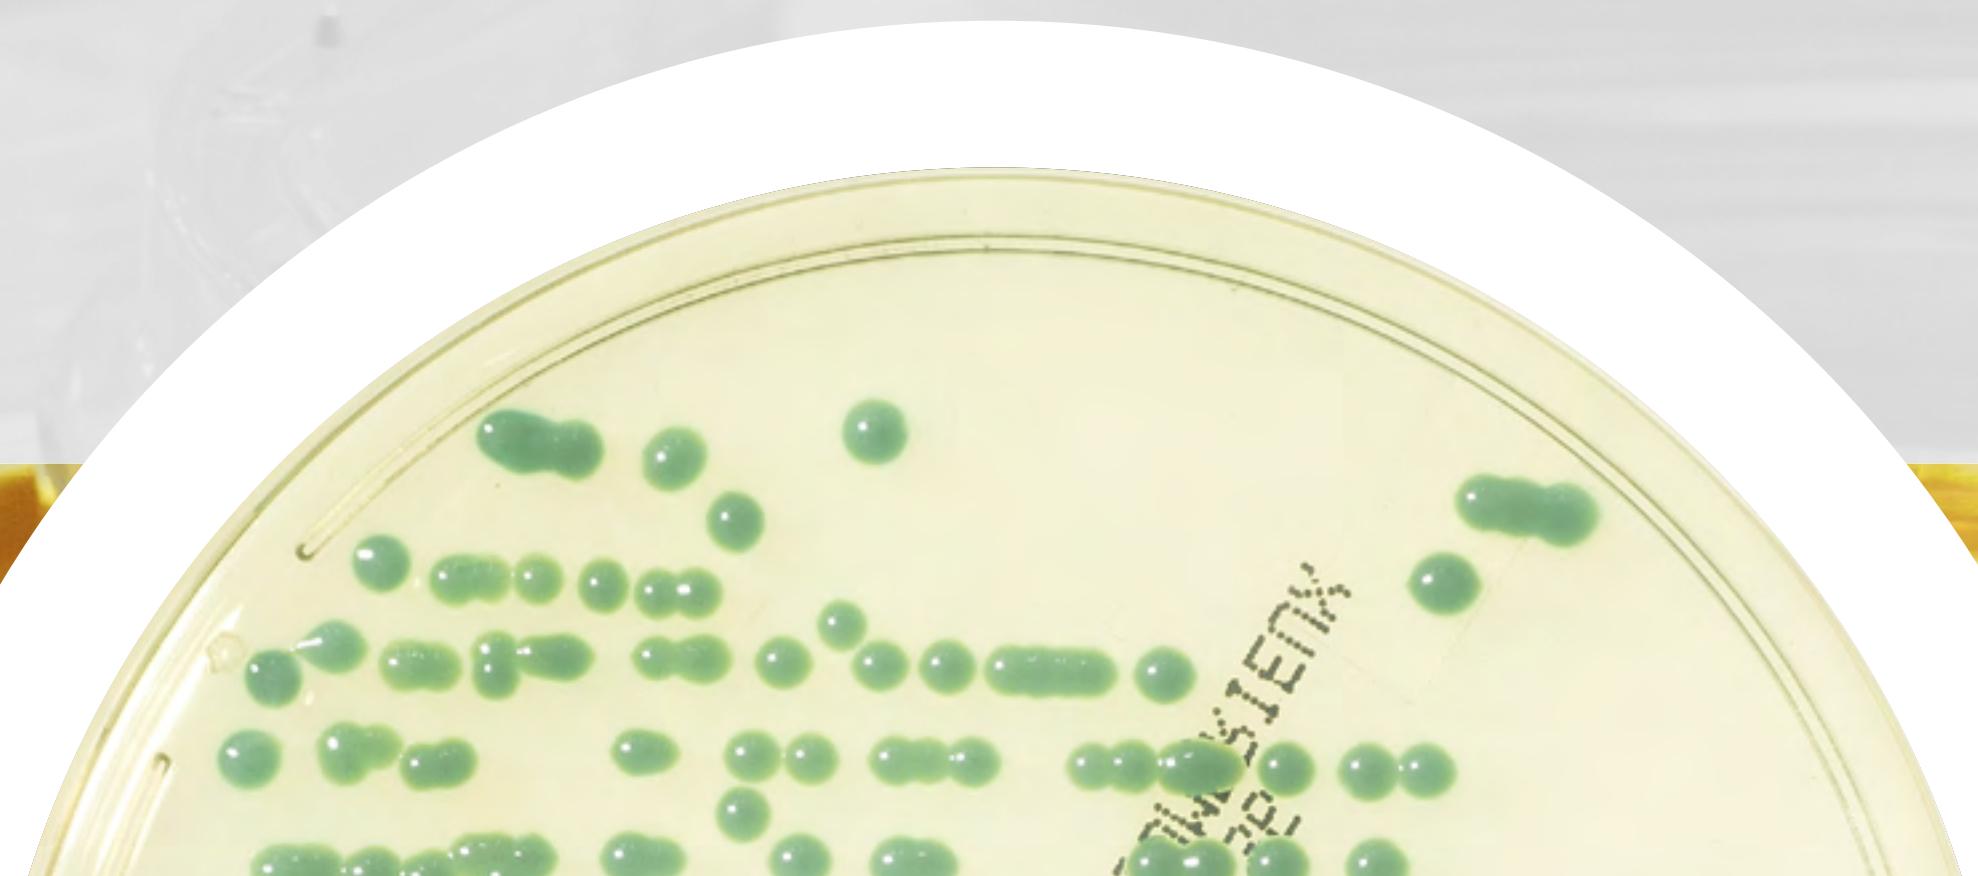

CHROMID® ESBL agar

- Validated on several specimens: stools, urines, respiratory samples and rectal swabs.
- Direct identification of *E. coli*, KESC and *Proteaeae*.
- Detection of a wide range of Multi-Drug-Resistant *Enterobacteriales*

For more information, consult the instructions for use.

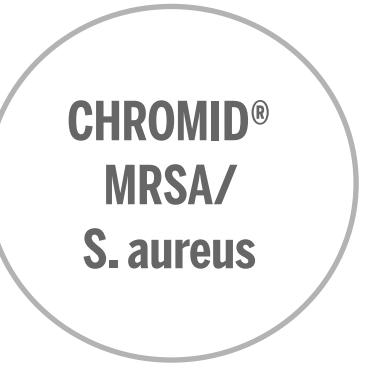

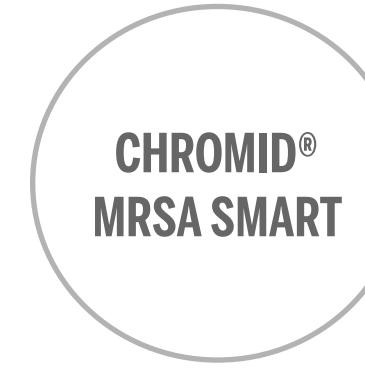

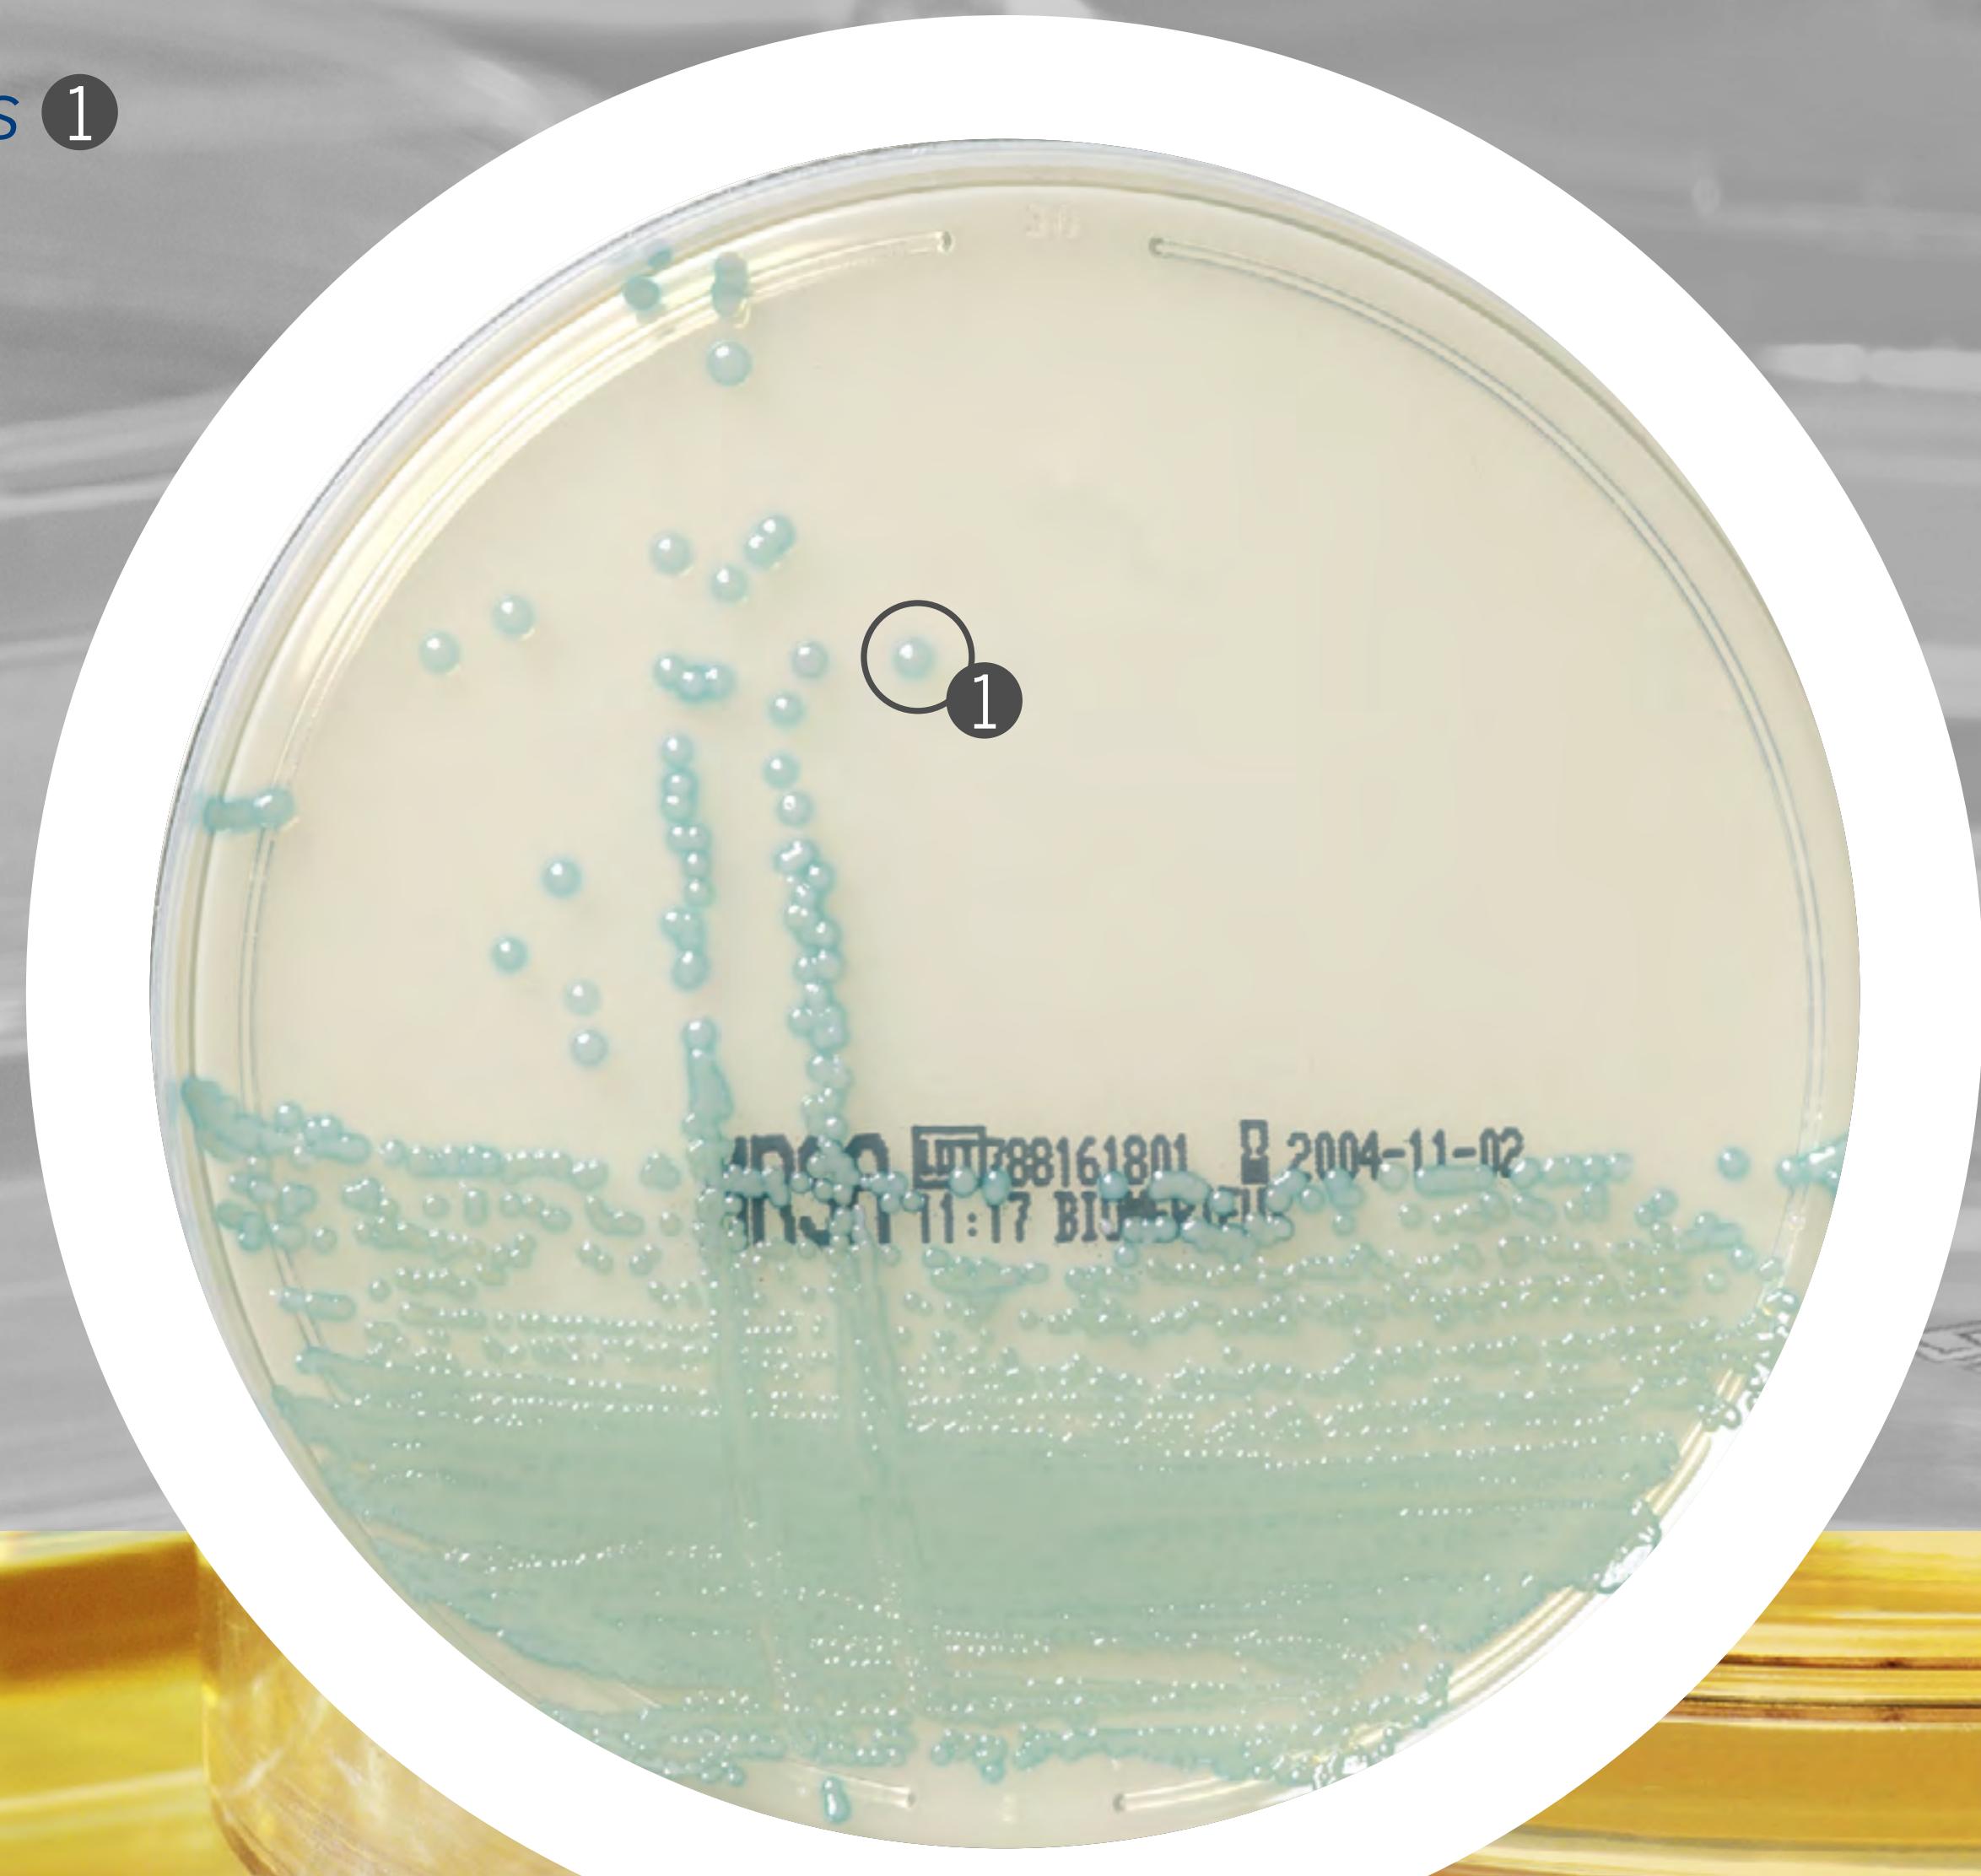

CHROMID® MRSA agar

Screening of Methicillin-resistant *Staphylococcus aureus* (MRSA)^{(9), (10)}

Methicillin-resistant *S.aureus* ①

18 hours

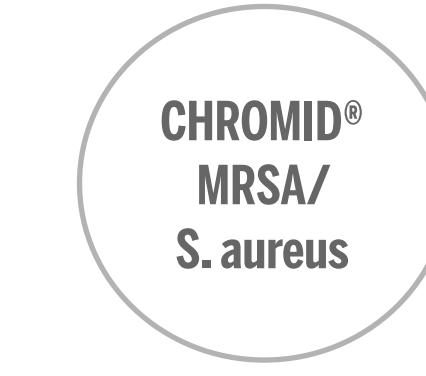

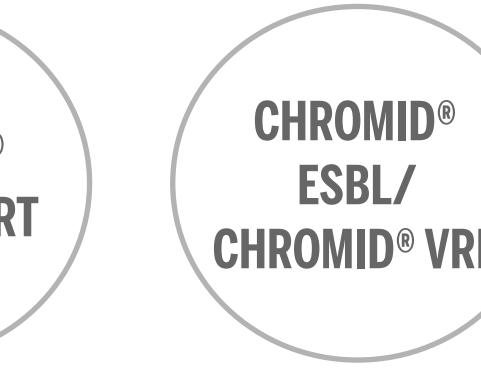

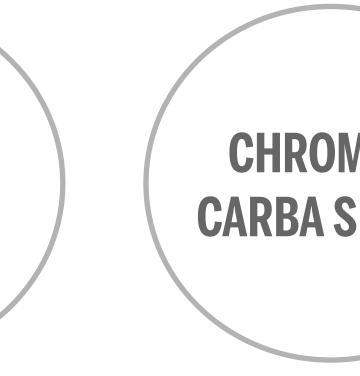

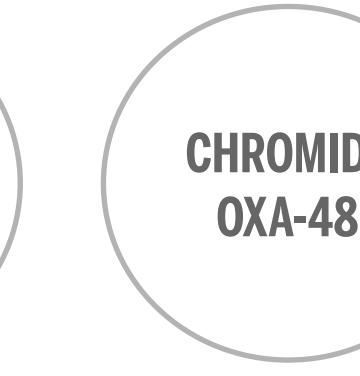

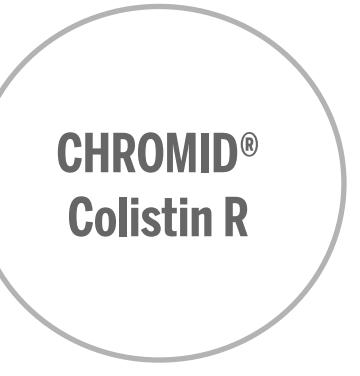

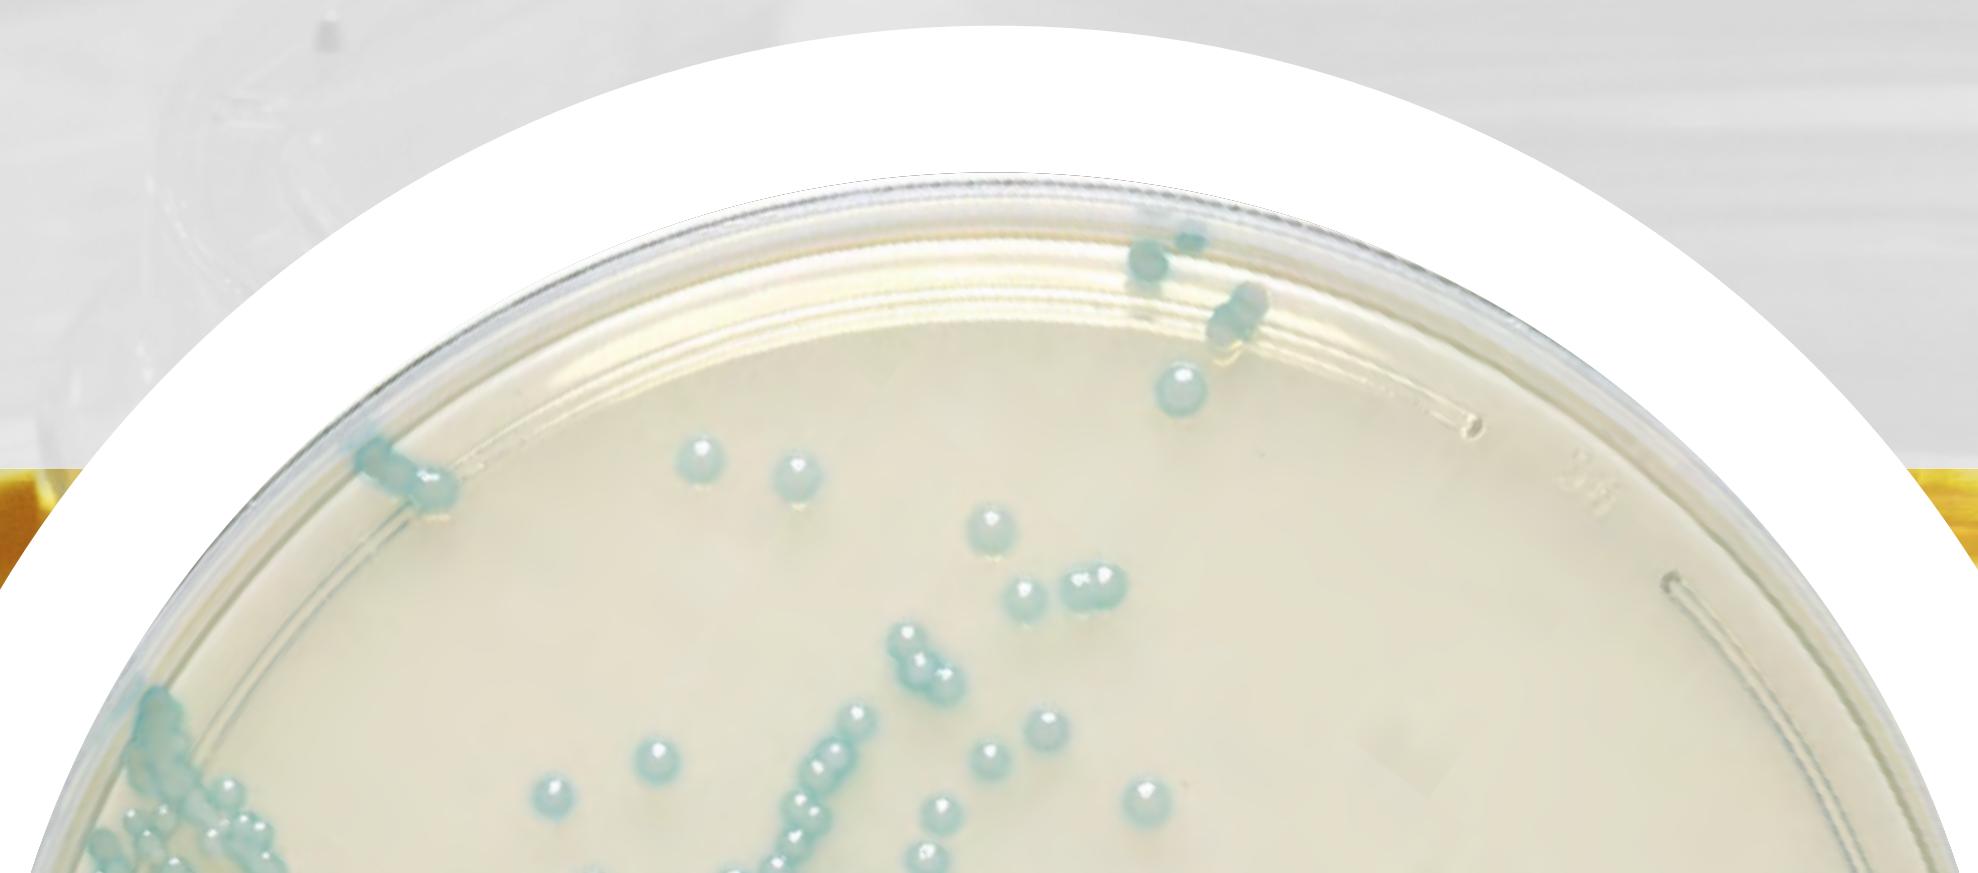

CHROMID® MRSA agar

- Direct identification of MRSA in nasal swabs in 18/24h.
- Detection of MecC and MecA validated by external studies^(9, 10)
- Formula FDA cleared
- Validated on nasal swabs, throat, perineum, wound, groin and positive blood culture

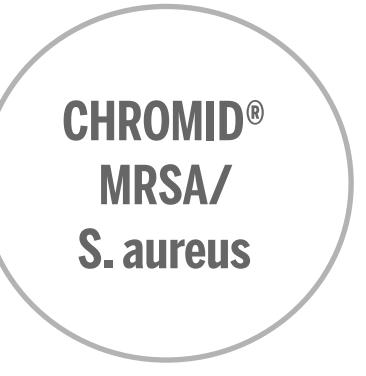

For more information, consult the instructions for use.

CHROMID® MRSA SMART agar

Screening of methicillin-resistant *Staphylococcus aureus* in 18-24 hours
on nasal swabs, throat, perineum, wound, groin and positive blood
culture specimens⁽¹⁷⁾

Methicillin-resistant *S.aureus* ①
18 hours

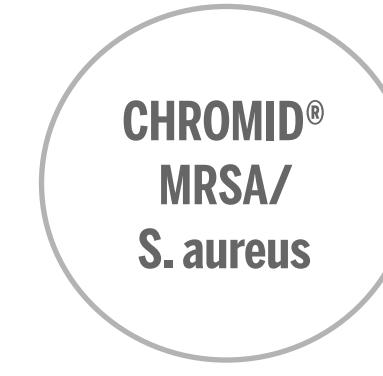

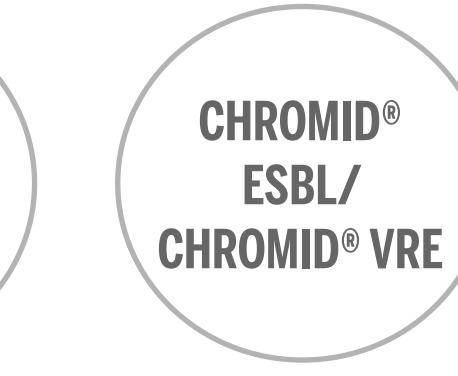

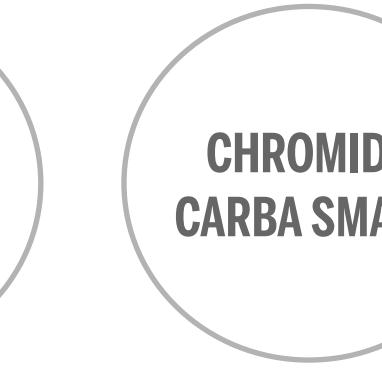

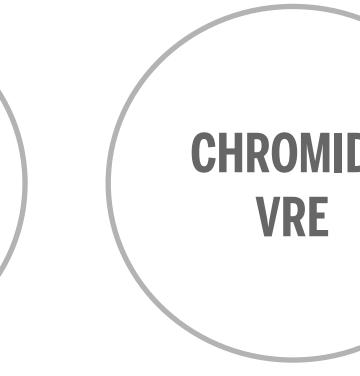

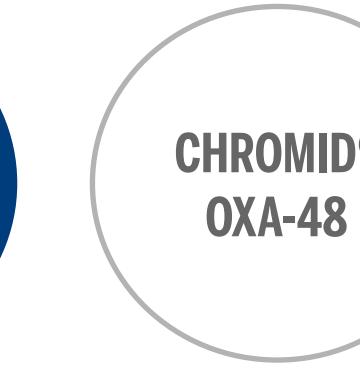

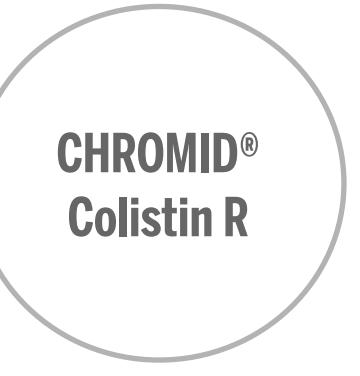

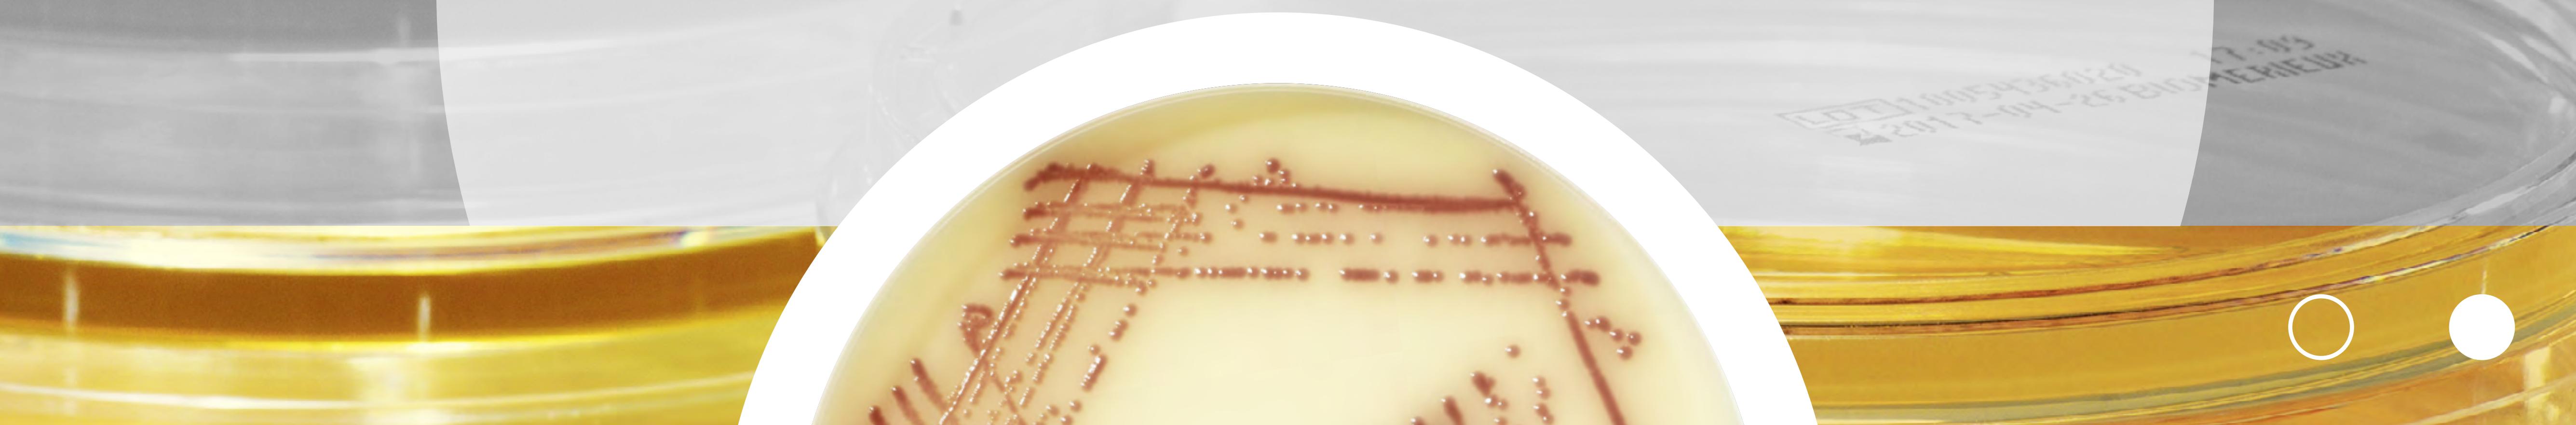

CHROMID® MRSA SMART agar

- Rapid and direct identification of MRSA in 18/24 hours
- Detection of MecC and MecA validated by external studies⁽¹⁷⁾
- Compatible for all routines with and without enrichment phase on nasal swabs, throat, groin, perineum, wounds, axilla

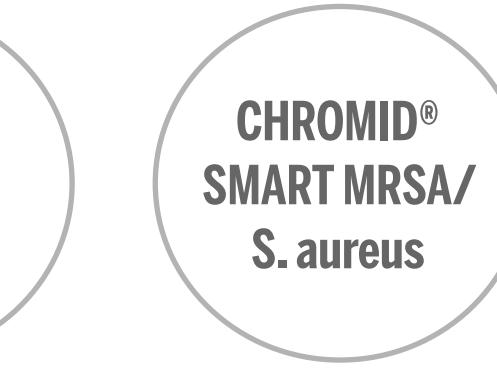

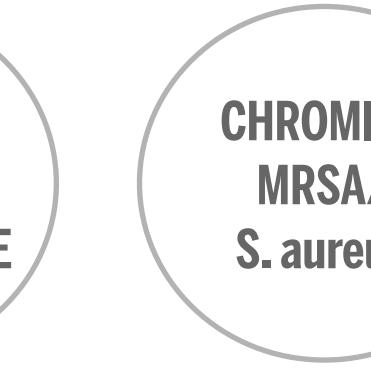

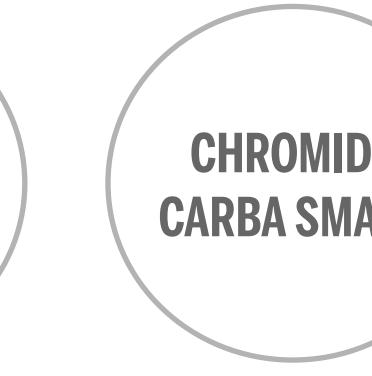

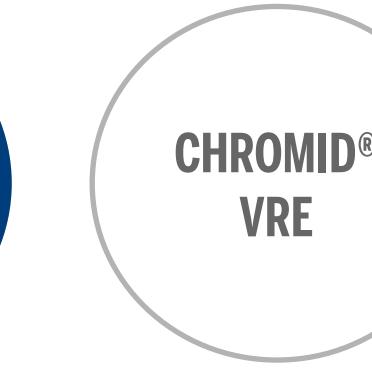

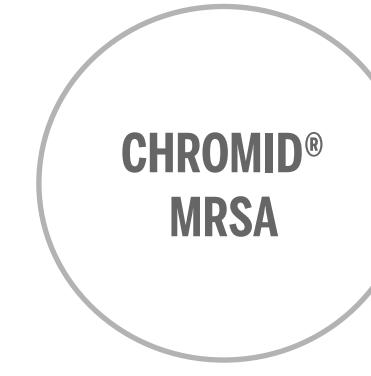

For more information, consult the *instructions for use*.

CHROMID® OXA-48 agar

Screening of carbapenemase OXA-48 producing *Enterobacterales* in 18-24 hours on clinical specimens - stools or rectal swabs.

K.pneumoniae 1 - *E.coli* 2
18 hours

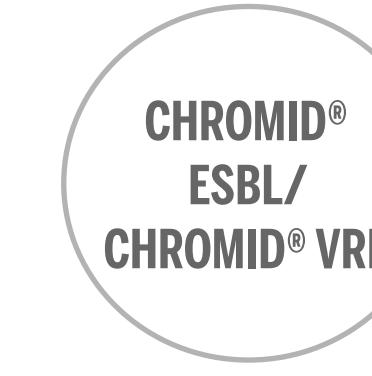

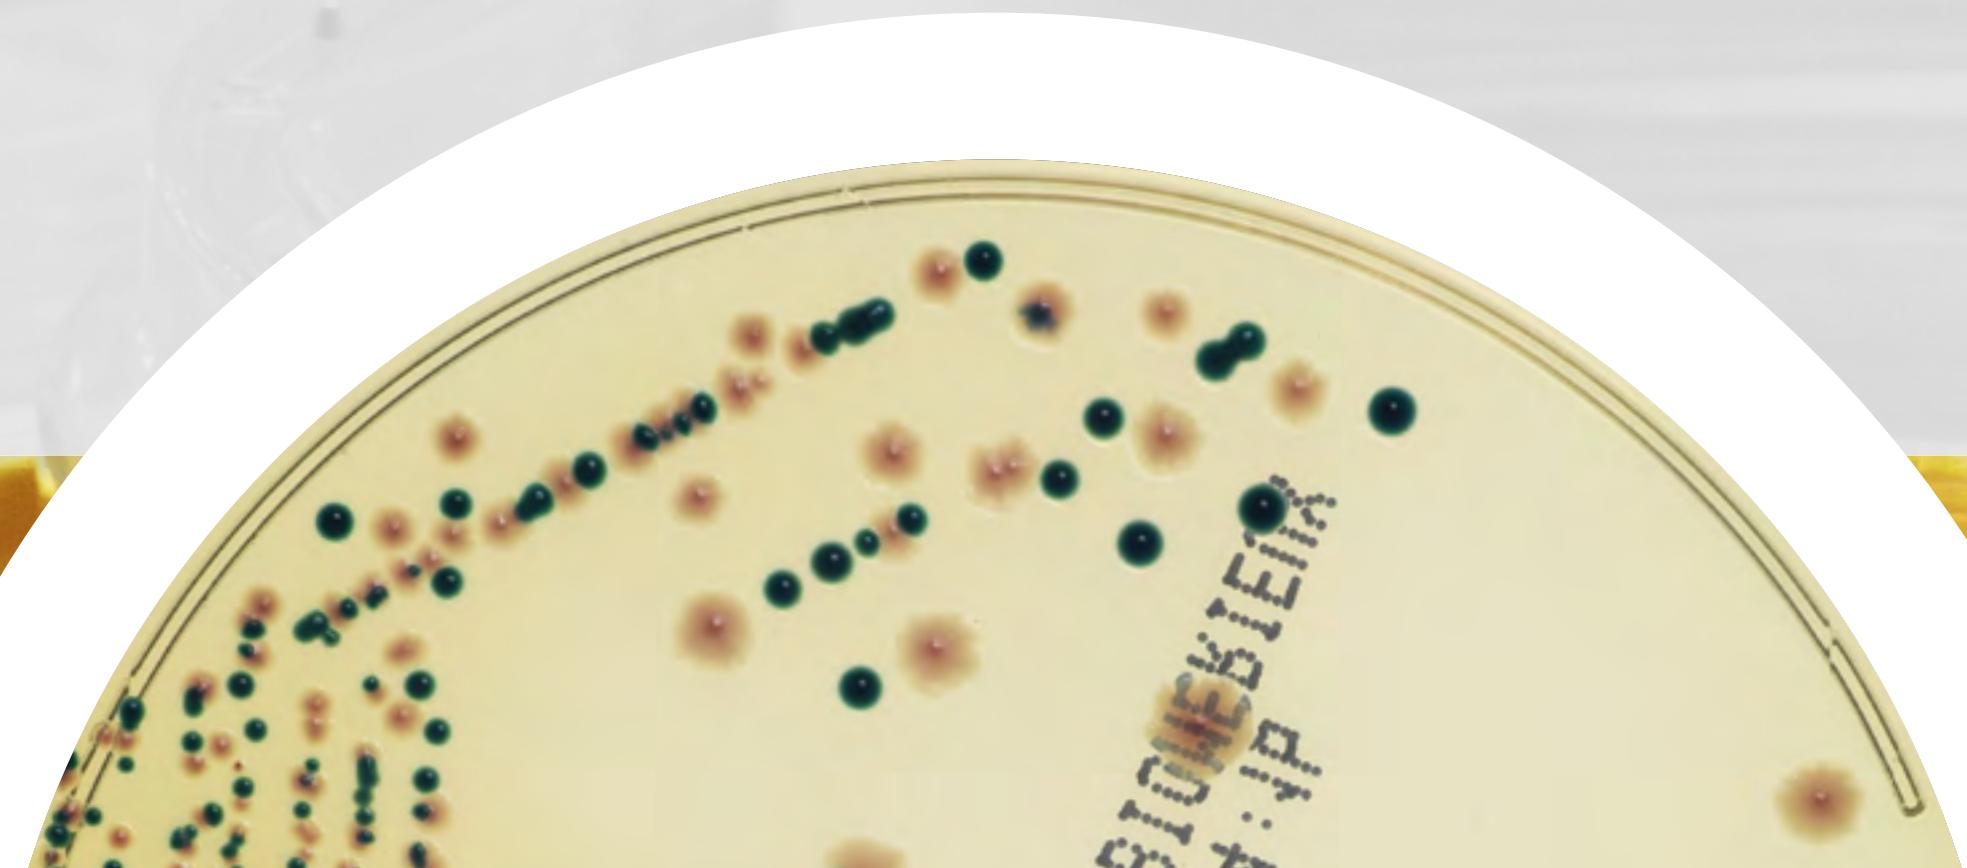

CHROMID® OXA-48 agar

- Direct identification of *E.coli*, KESC, *Proteae*
- Detection of OXA-48 producing *Enterobacterales* in 18/24 hours
- Recommended when outbreaks

For more information, consult the instructions for use.

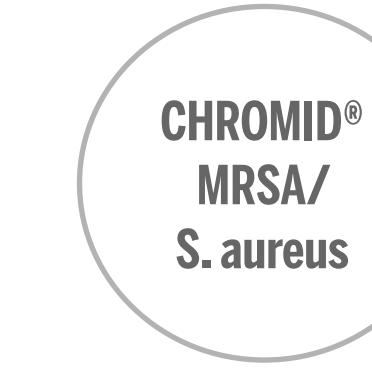

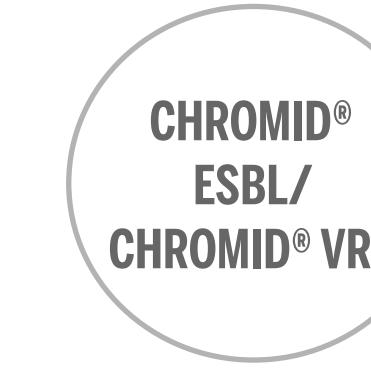

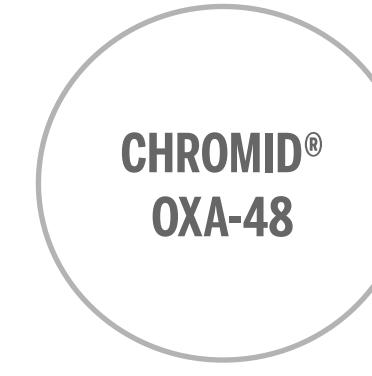

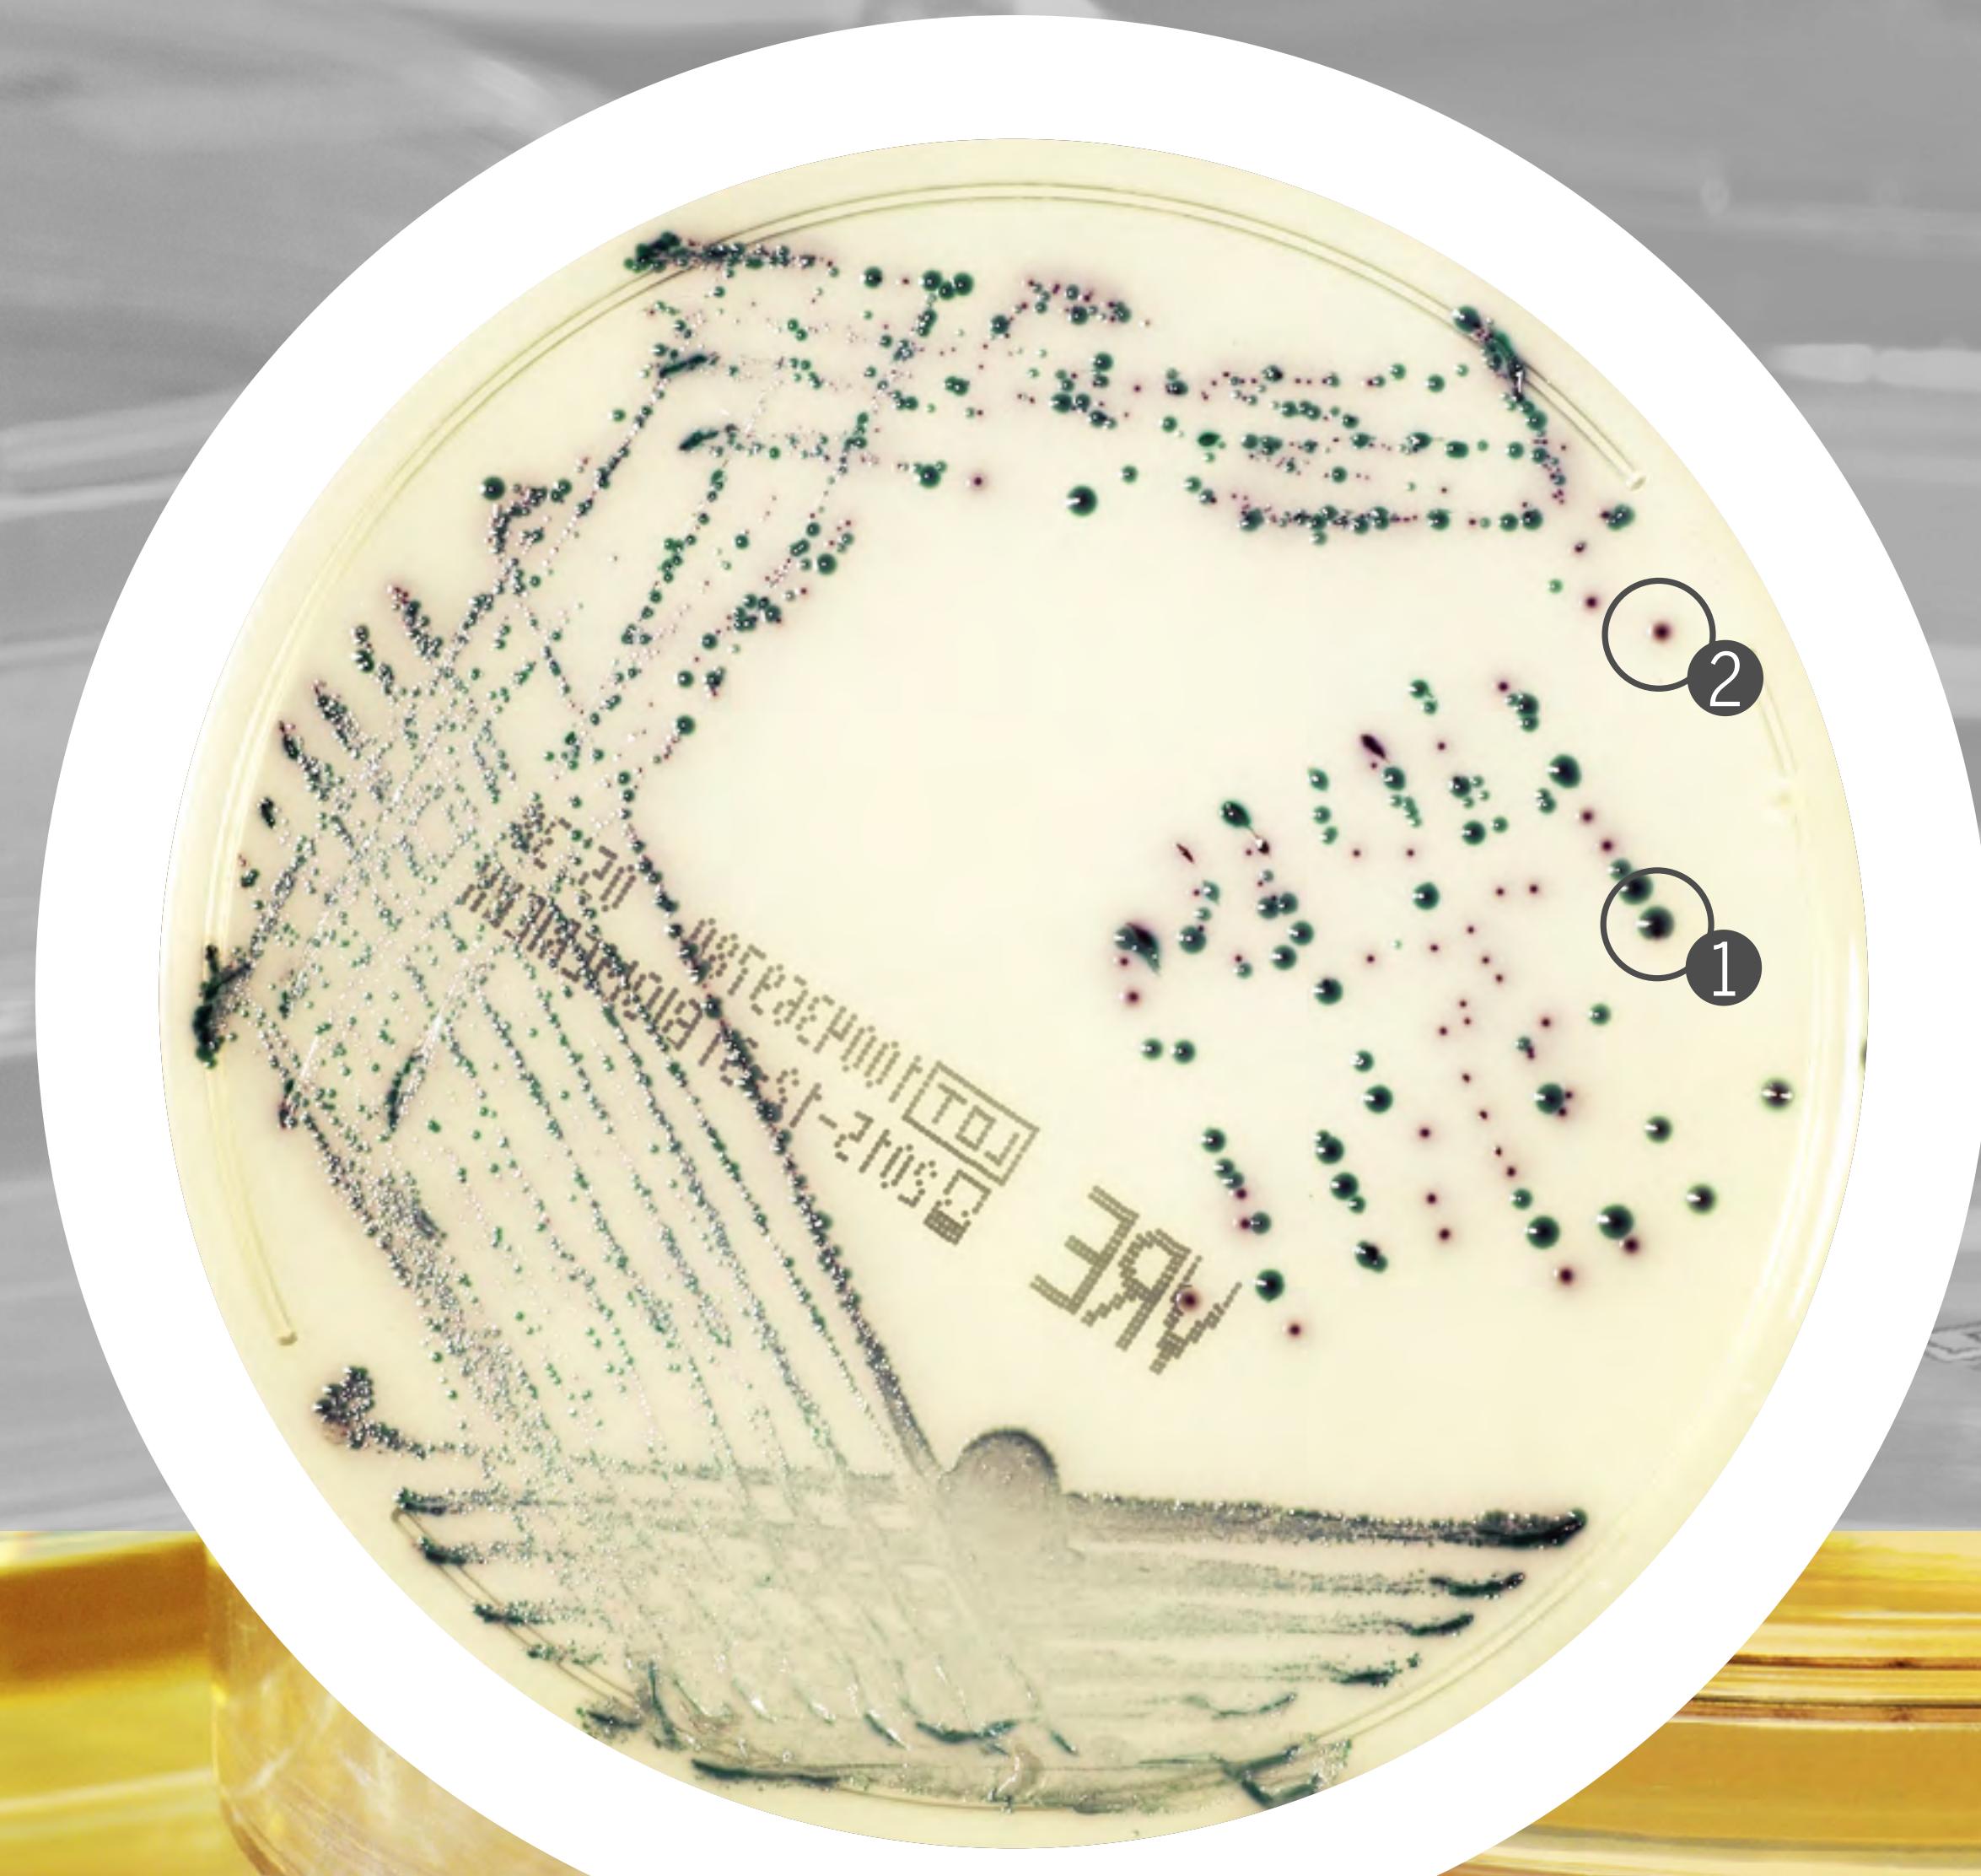

CHROMID® VRE agar

Screening of VRE with characteristic coloration of *Enterococcus faecalis* and *E. faecium* in 24 hours on stools and rectal swab specimens.⁽¹⁴⁾

Enterococcus faecalis ①

Enterococcus faecium ②

24 hours

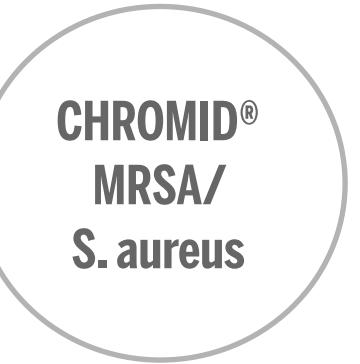

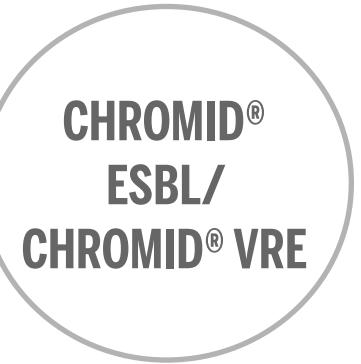

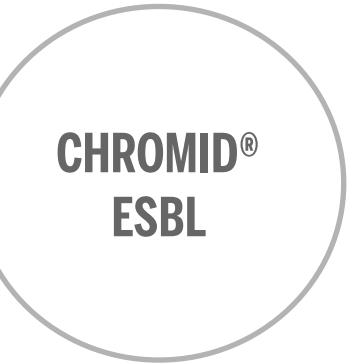

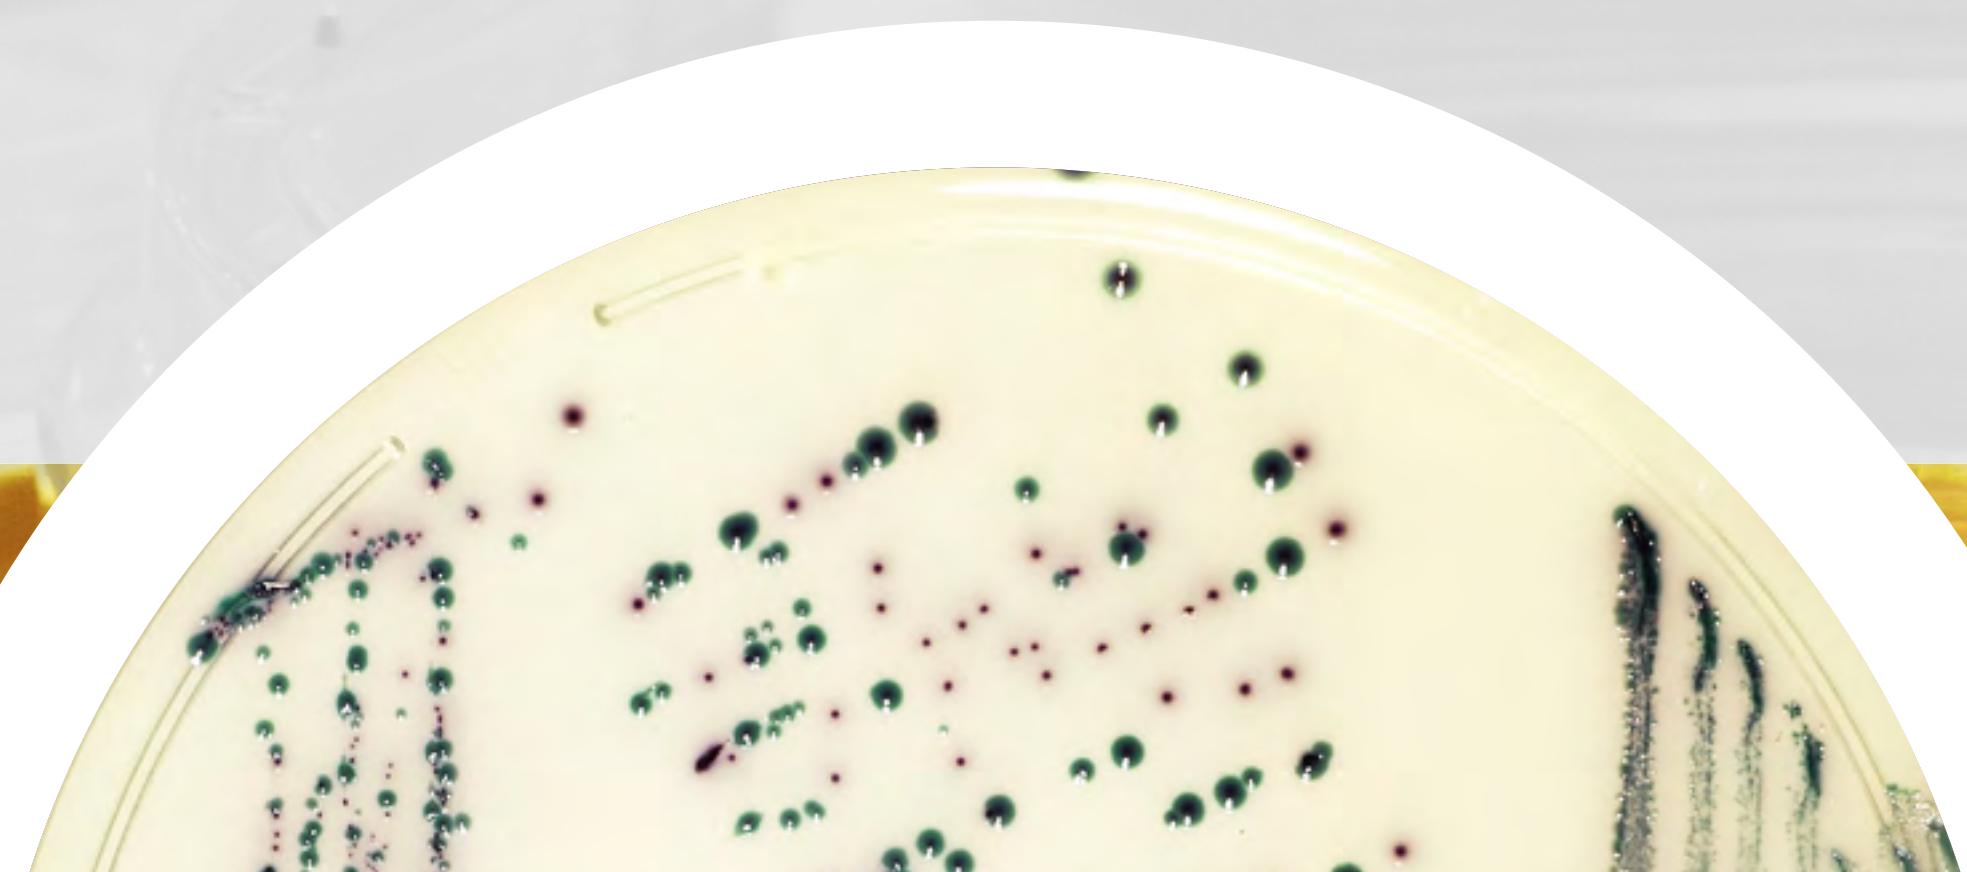

CHROMID® VRE agar

- Streamline the workflow by limiting confirmatory tests
- Easy to read & to implement in labs
- Increase the recovery of VanB, improve patients management

For more information, consult the instructions for use.

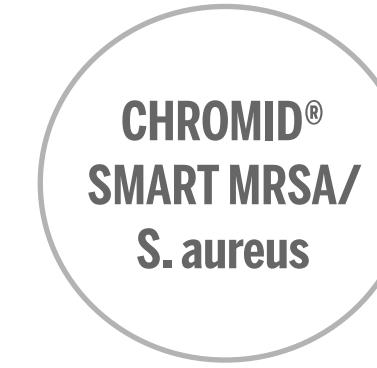

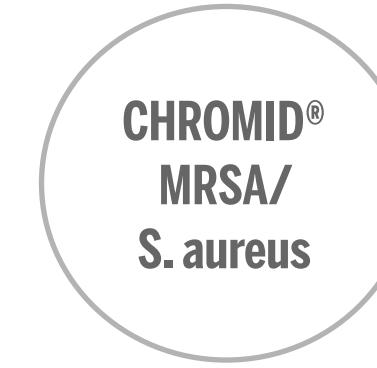

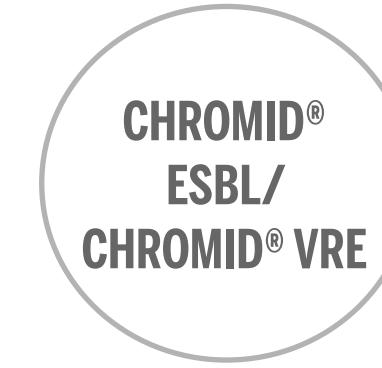

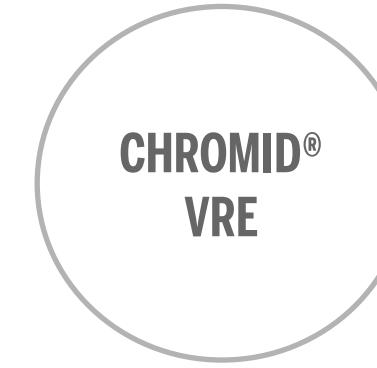

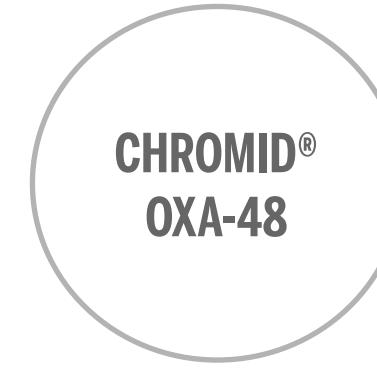

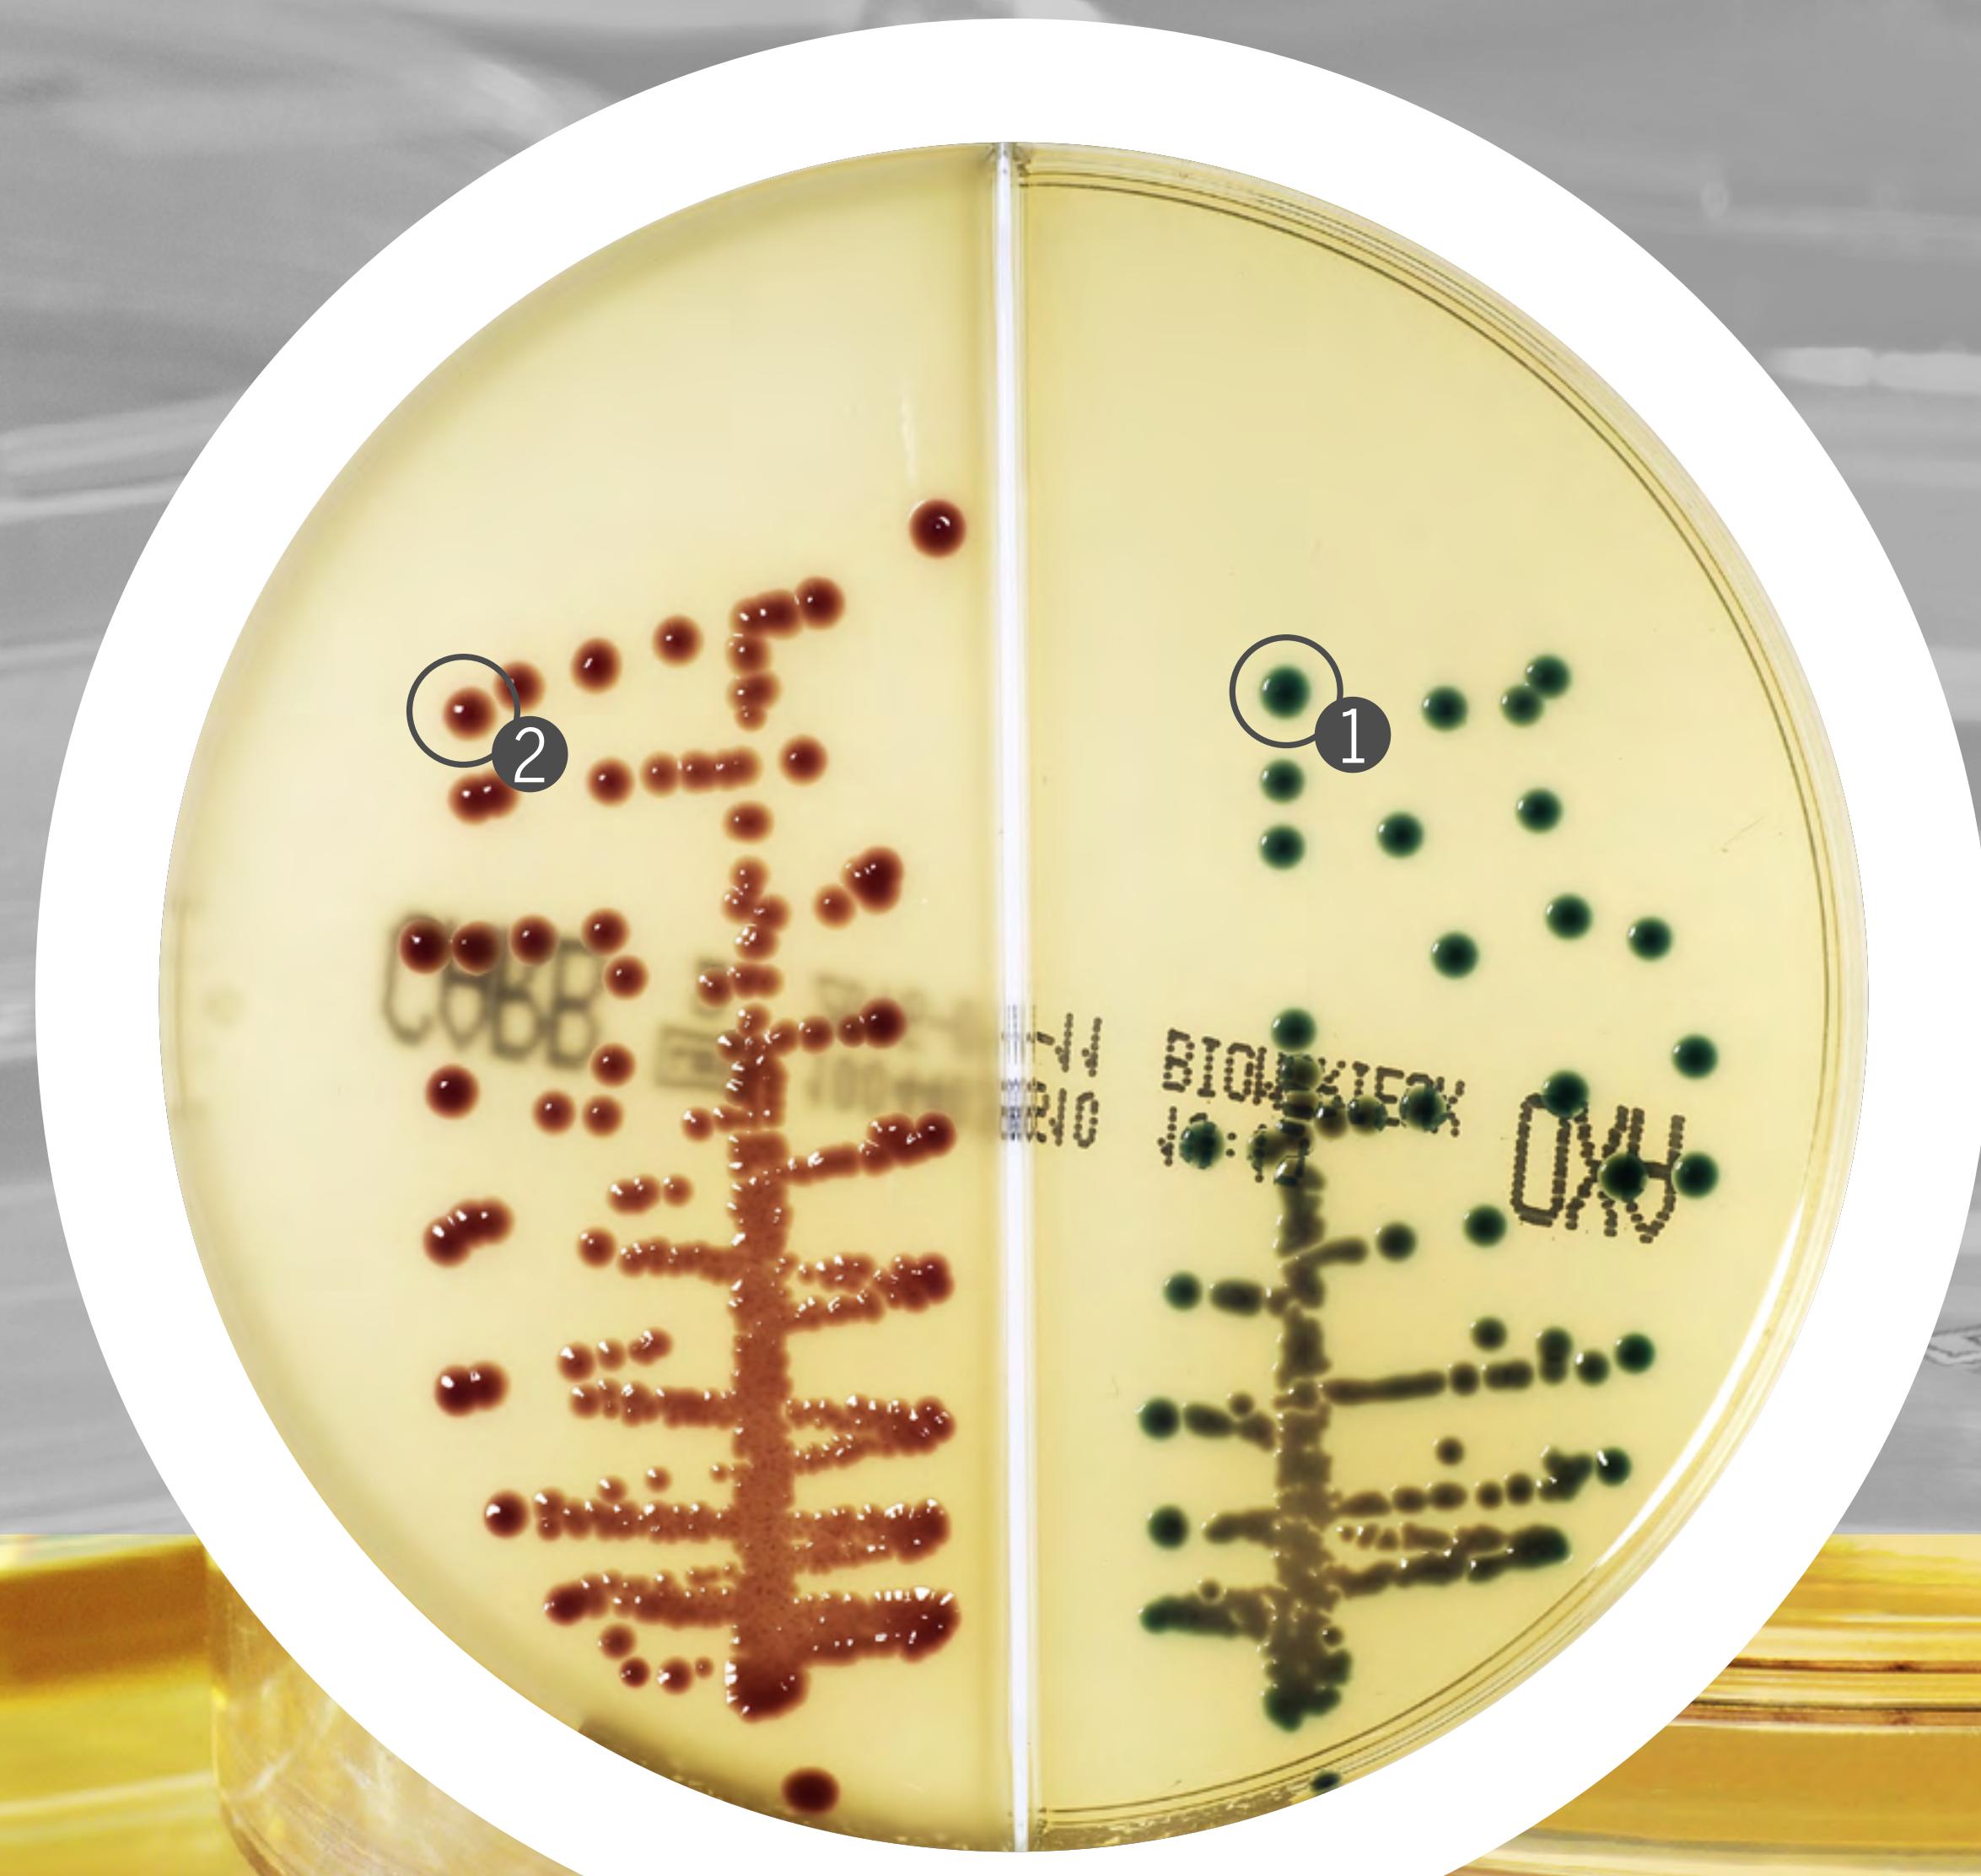

CHROMID® CARBA SMART agars

Screening of carbapenemase producing *Enterobacterales*
in 18-24 hours on clinical specimens - stools or rectal swabs.⁽⁴⁾

K.pneumoniae OXA-48 ①

E.coli KPC ②

18 hours

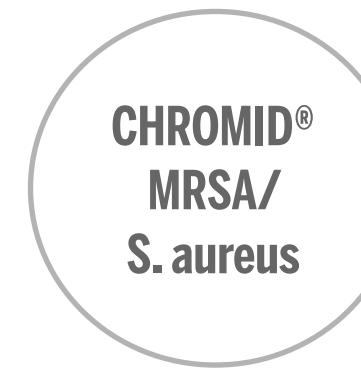

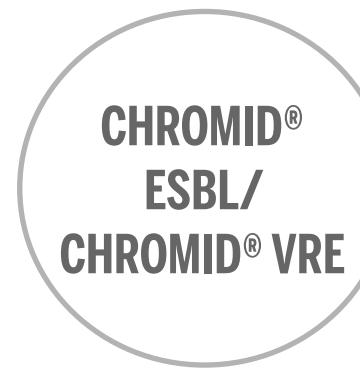

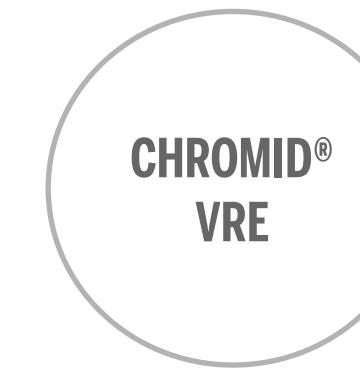

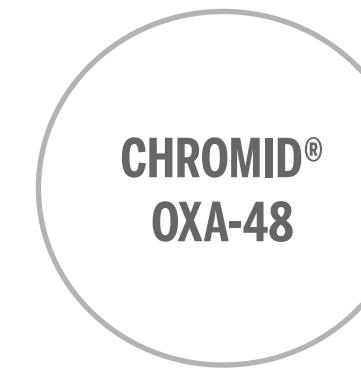

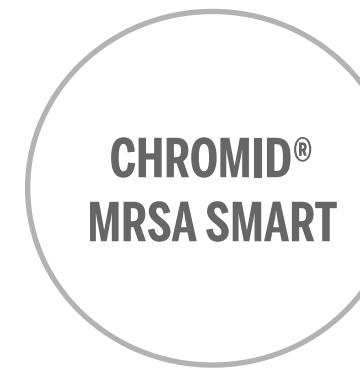

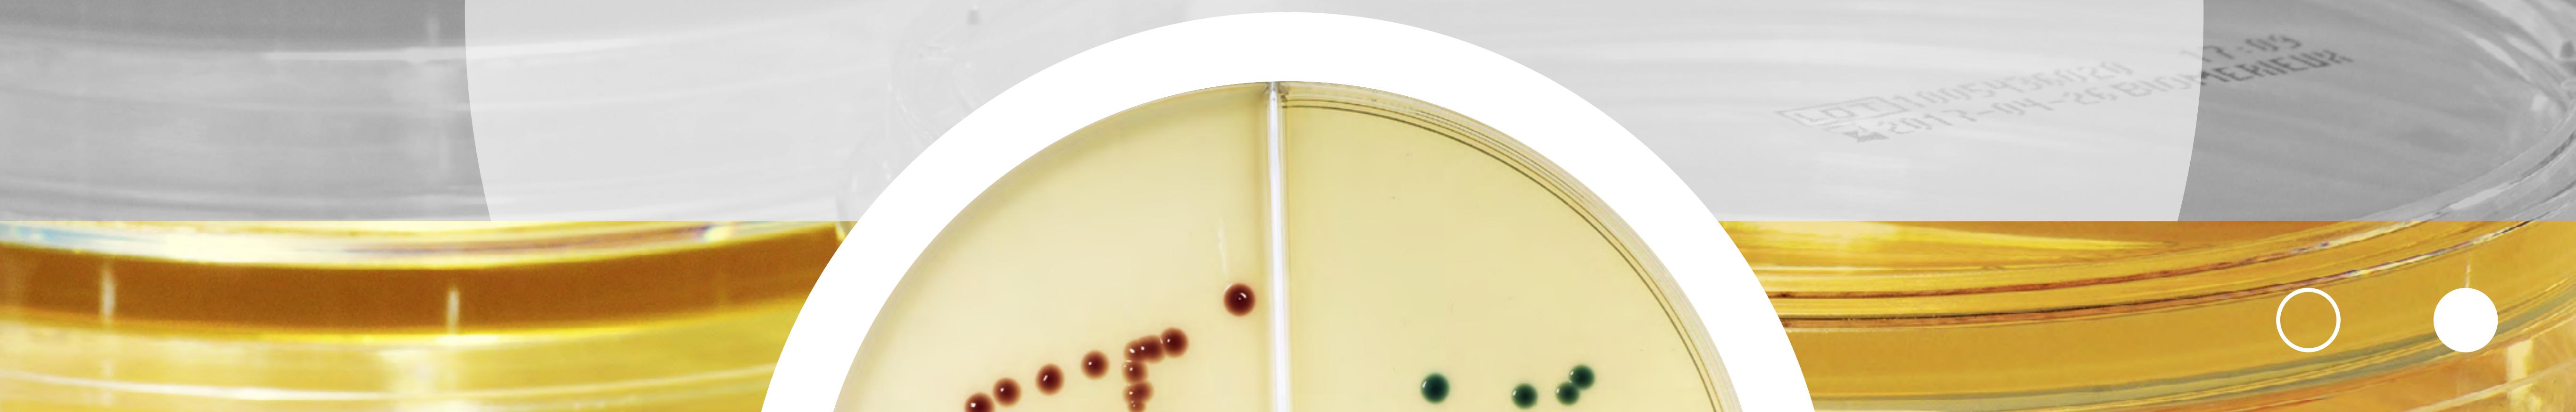

CHROMID® CARBA SMART agars

- Detection of the Carbapenemases:
KPC, OXA-48, NDM, VIM, IMP...
- Global solution for Resistance identification
thanks to RAPIDEC® CARBA NP compatibility
- Specificity of OXA-48 reaches 100%

For more information, consult the instructions for use.

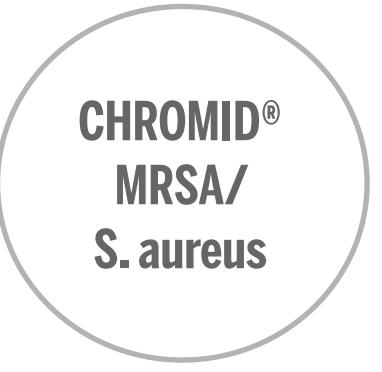

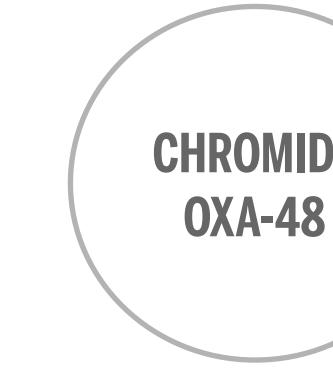

CHROMID® ESBL/CHROMID® VRE agars

Selective chromogenic media: for the screening of Extended Spectrum β -Lactamase-producing enterobacteria (ESBL) and for the detection and differentiation of *Enterococcus faecium* and *E. faecalis* showing acquired vancomycin resistance (VRE).

ESBL *E. coli* ①

VR *Enterococcus faecium* ②

18/24 hours

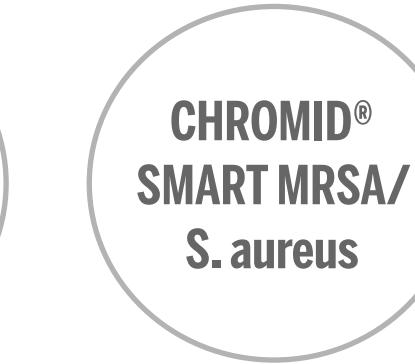

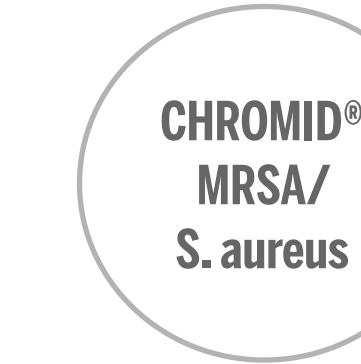

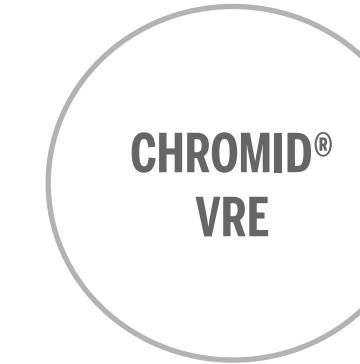

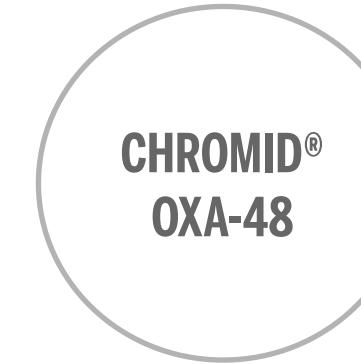

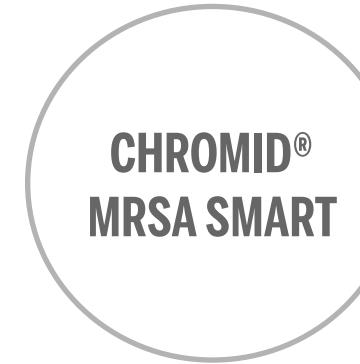

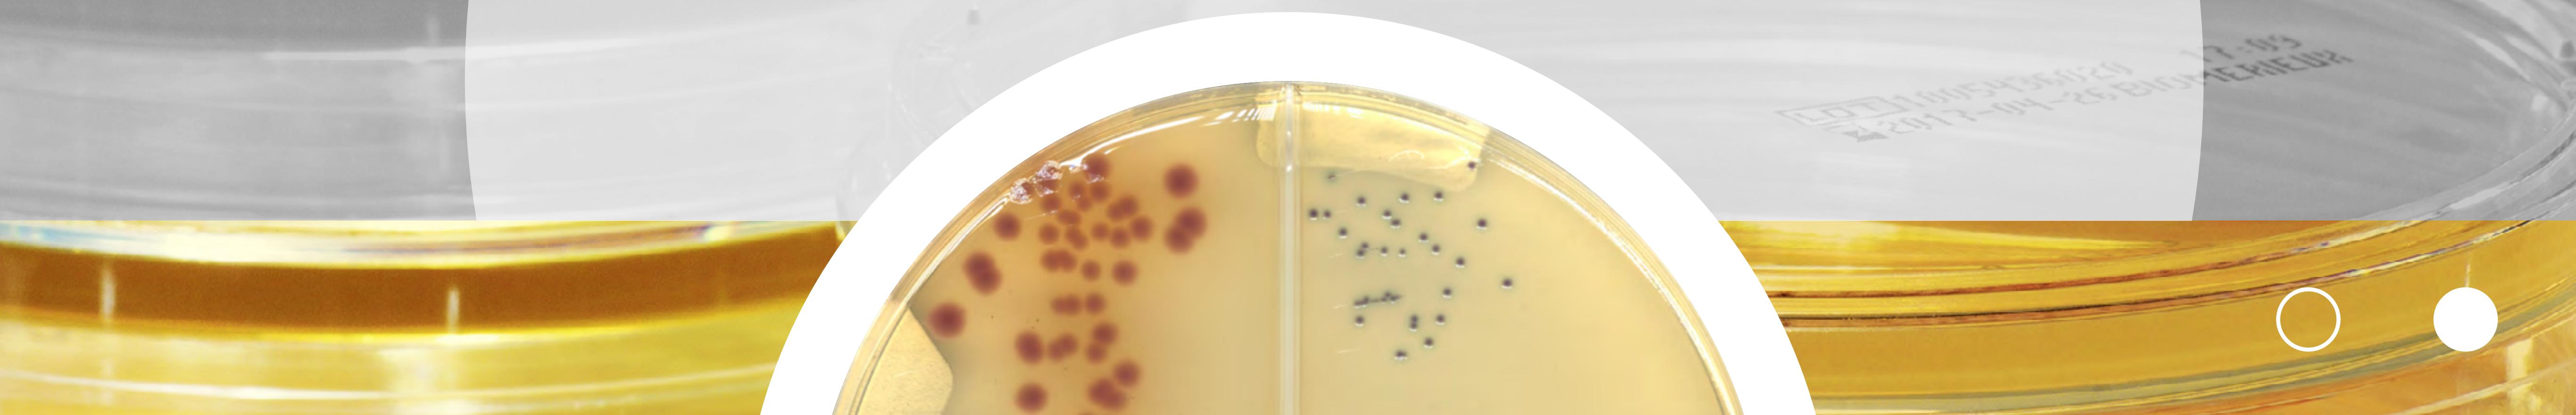

CHROMID® ESBL/CHROMID® VRE agars

- Only 1 handling step to test 2 media
- Two valuable resistance informations on the same specimen
- Reduce costs through improved stock and waste management

For more information, consult the instructions for use.

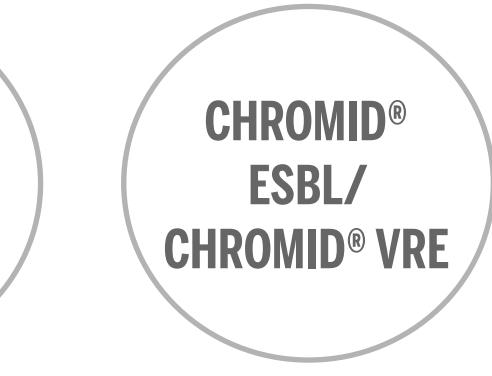

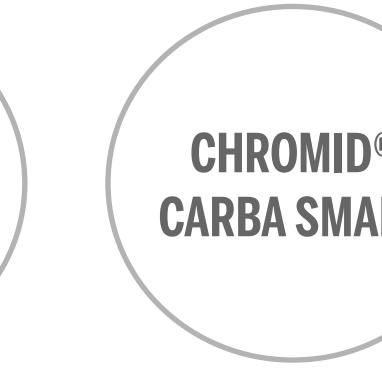

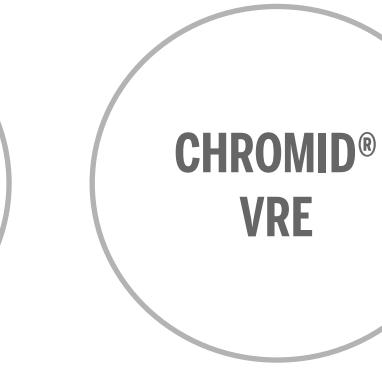

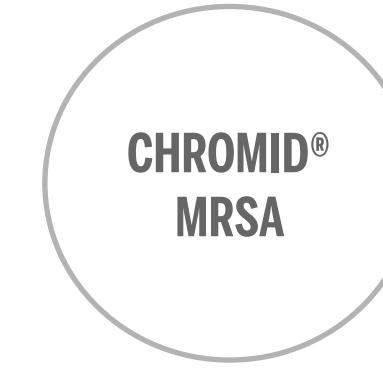

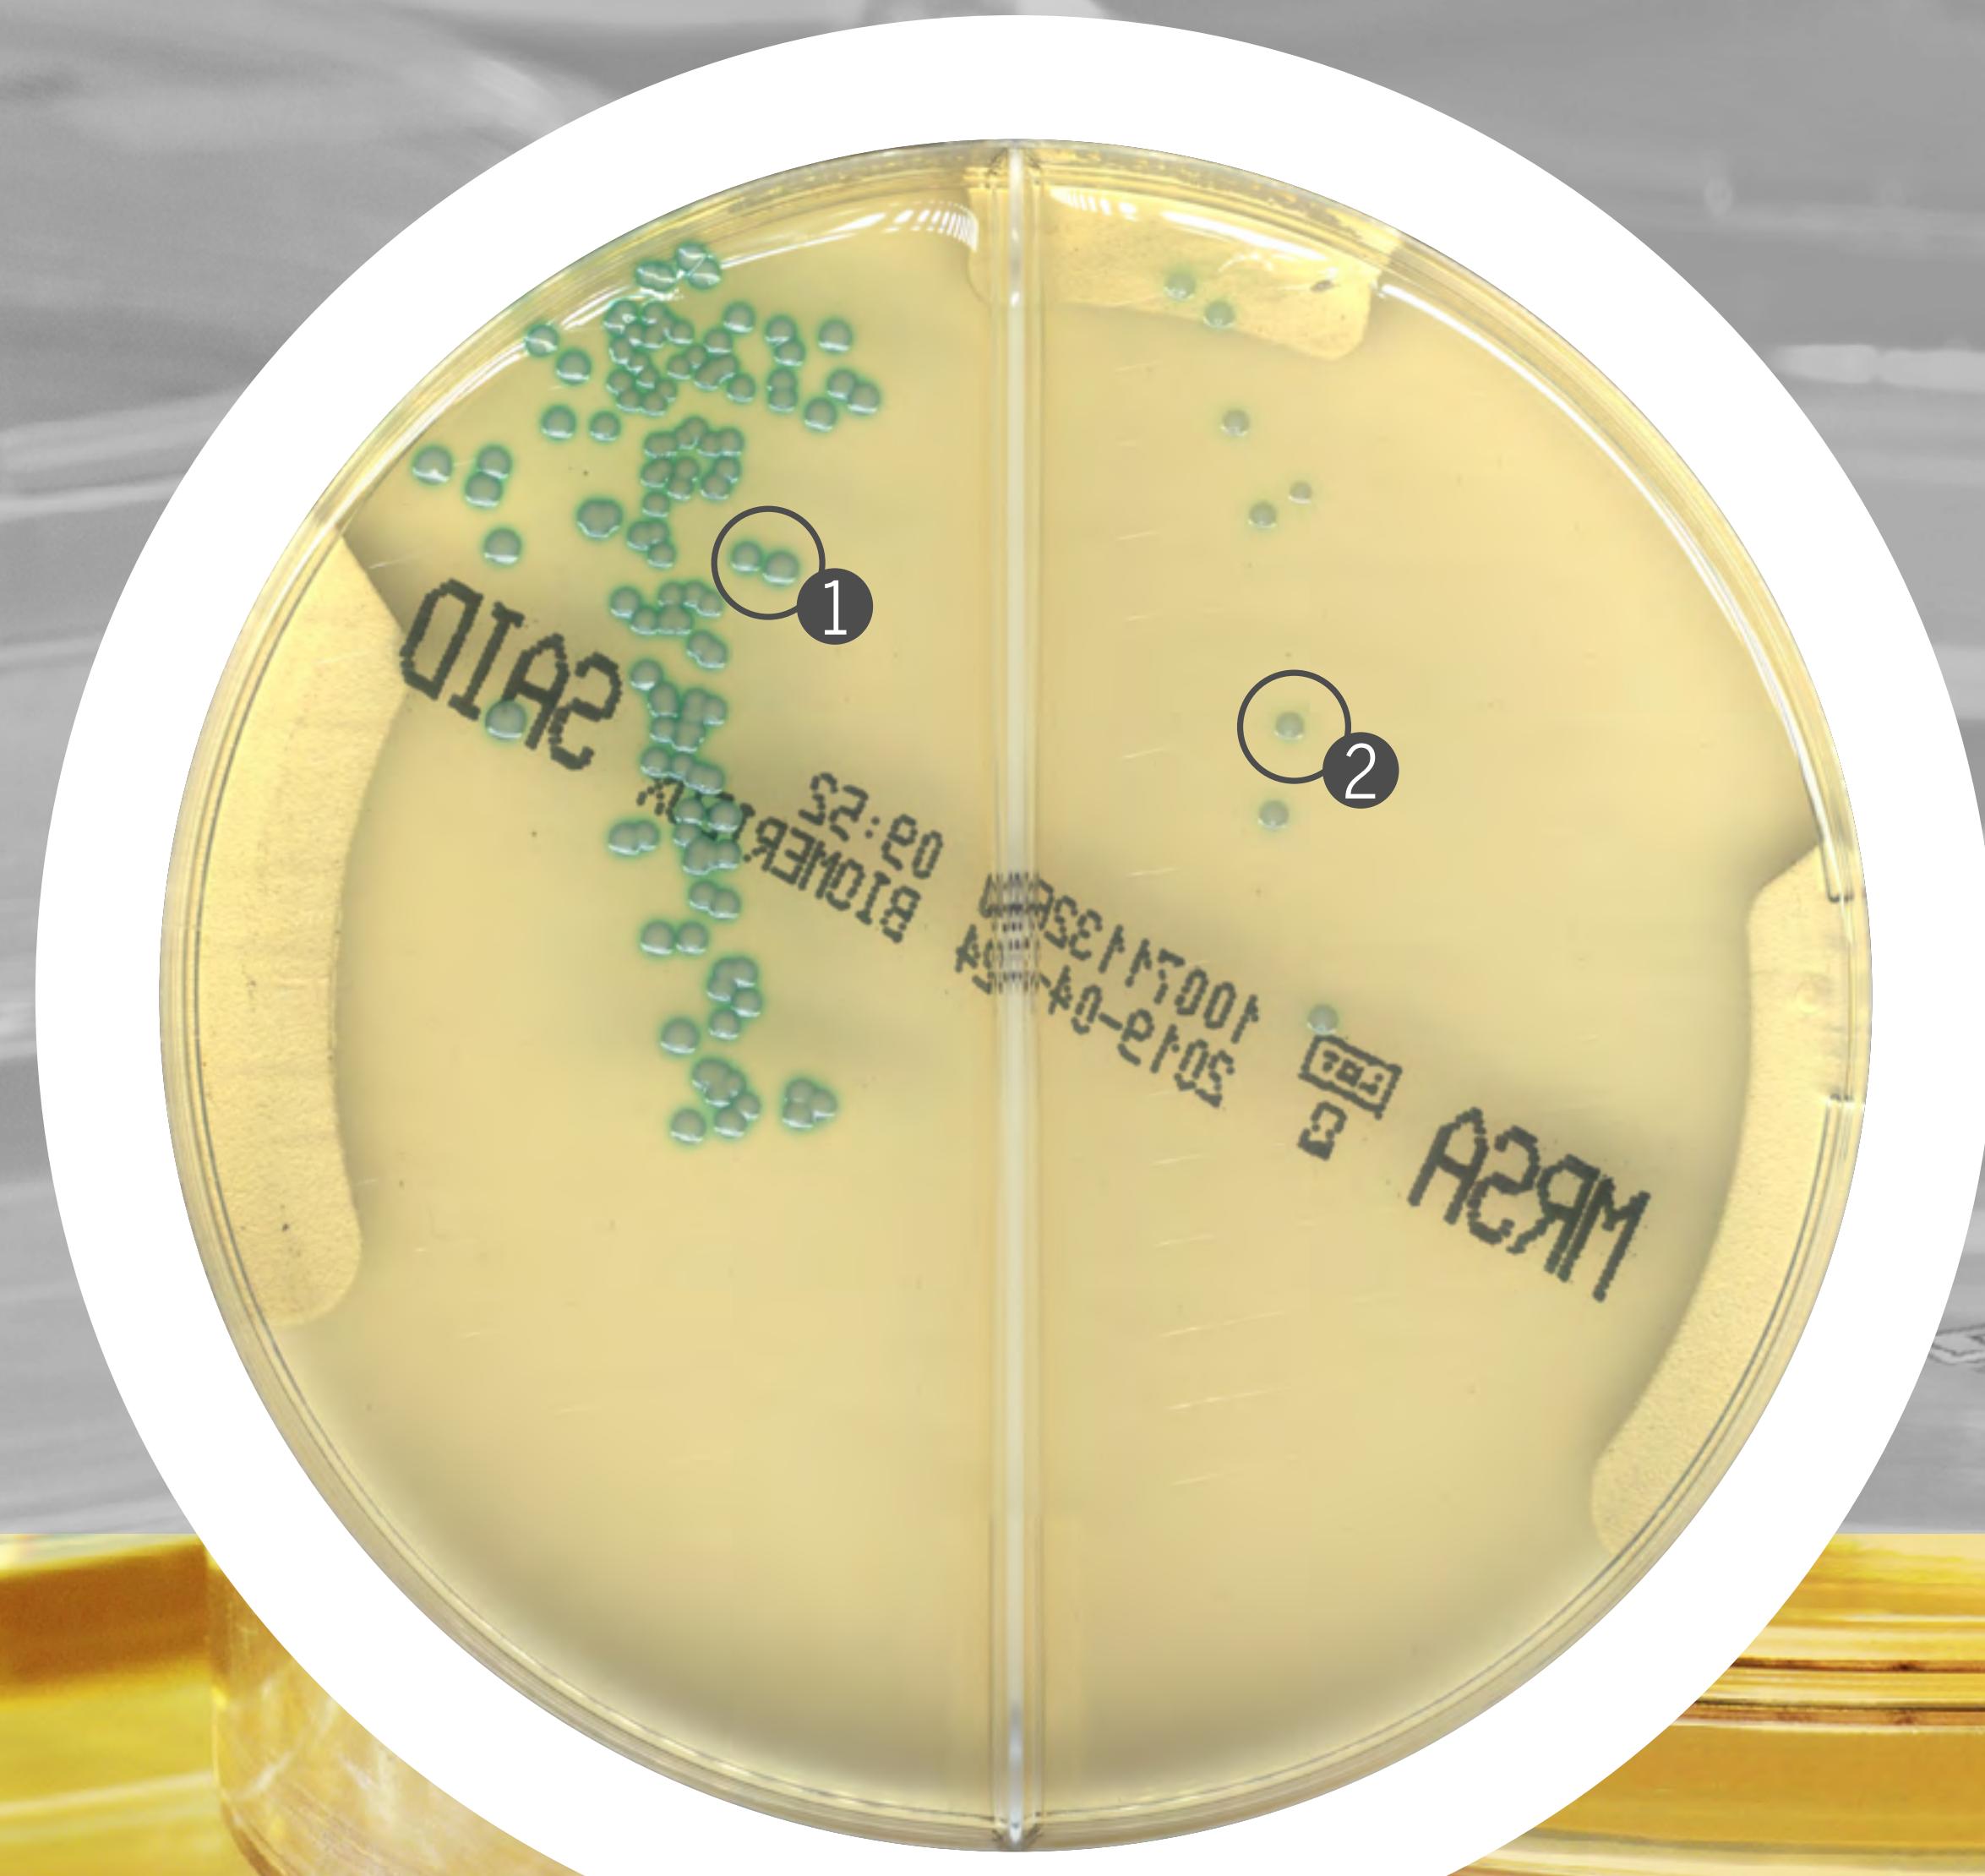

CHROMID® MRSA/S.aureus agars

Screening of methicillin-resistant *Staphylococcus aureus* (MRSA) and selective isolation of staphylococci and the direct identification of *S. aureus*.

S.aureus MSSA & MRSA ①

MRSA ②

24 hours

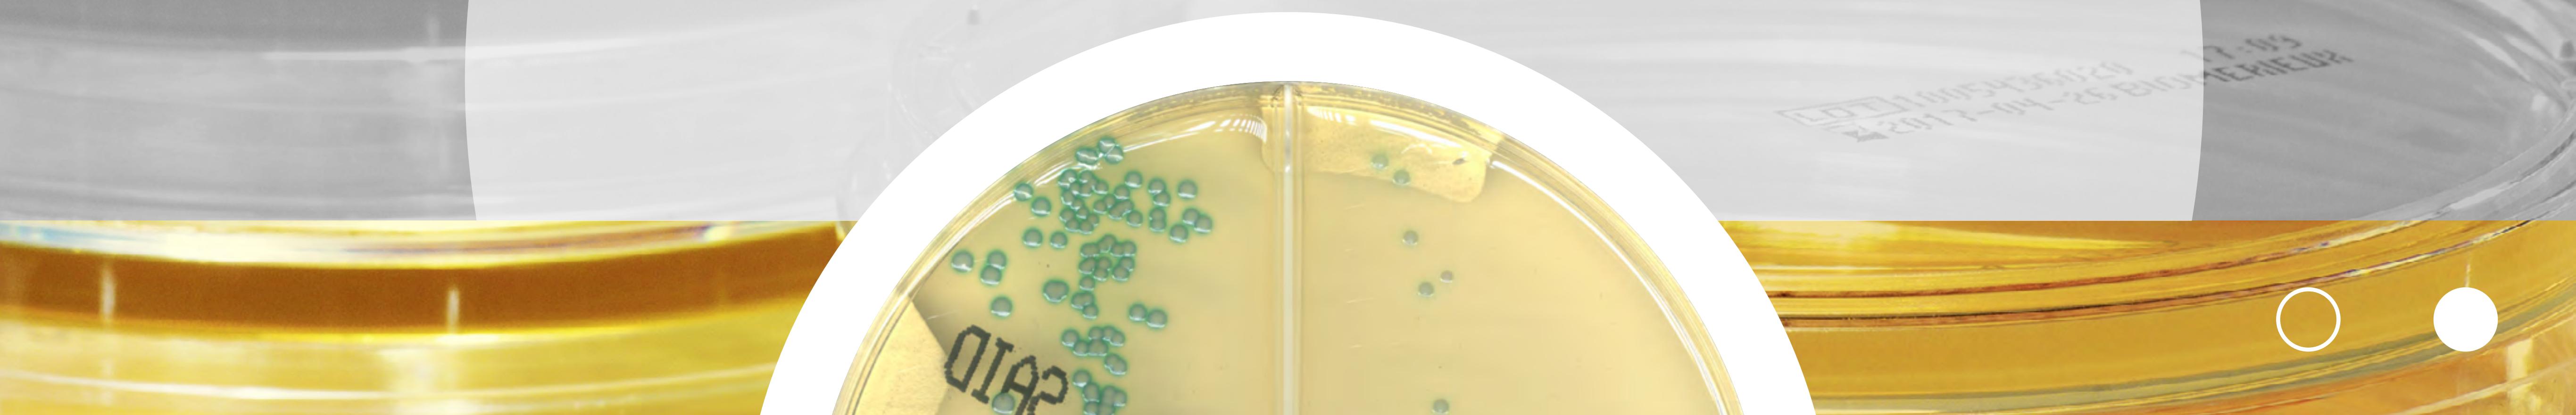

CHROMID® MRSA/S.aureus agars

- Only 1 handling step to manage 2 media
- Simultaneous detection of *S. aureus* and MRSA
- Reduce costs through improved stock and waste management

For more information, consult the instructions for use.

CHROMID® SMART MRSA/S.aureus agars

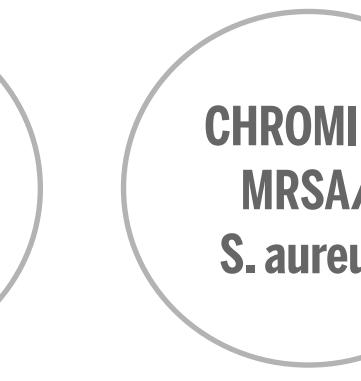

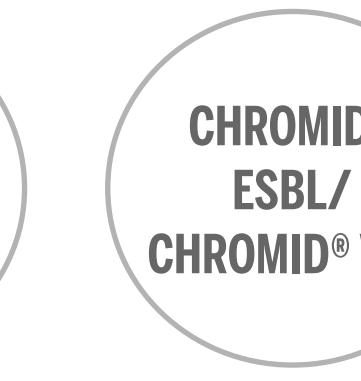

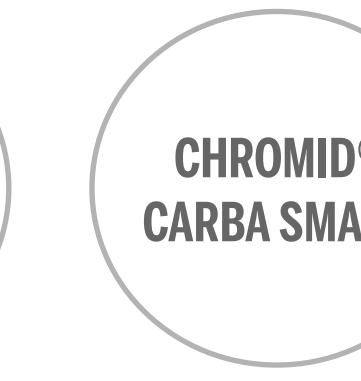

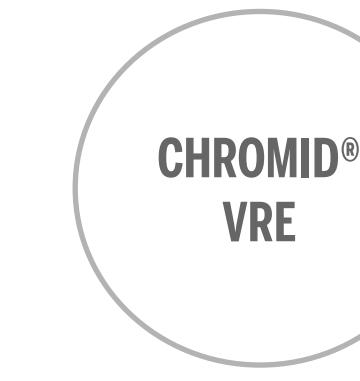

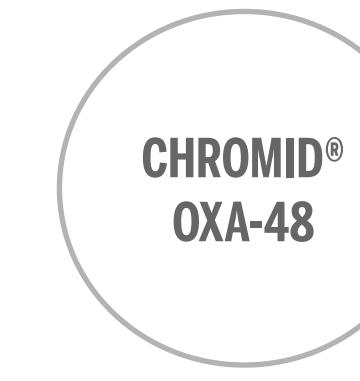

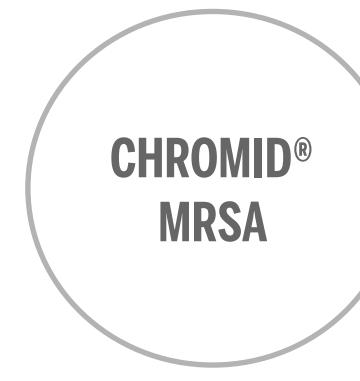

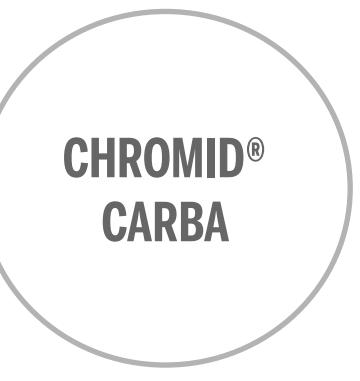

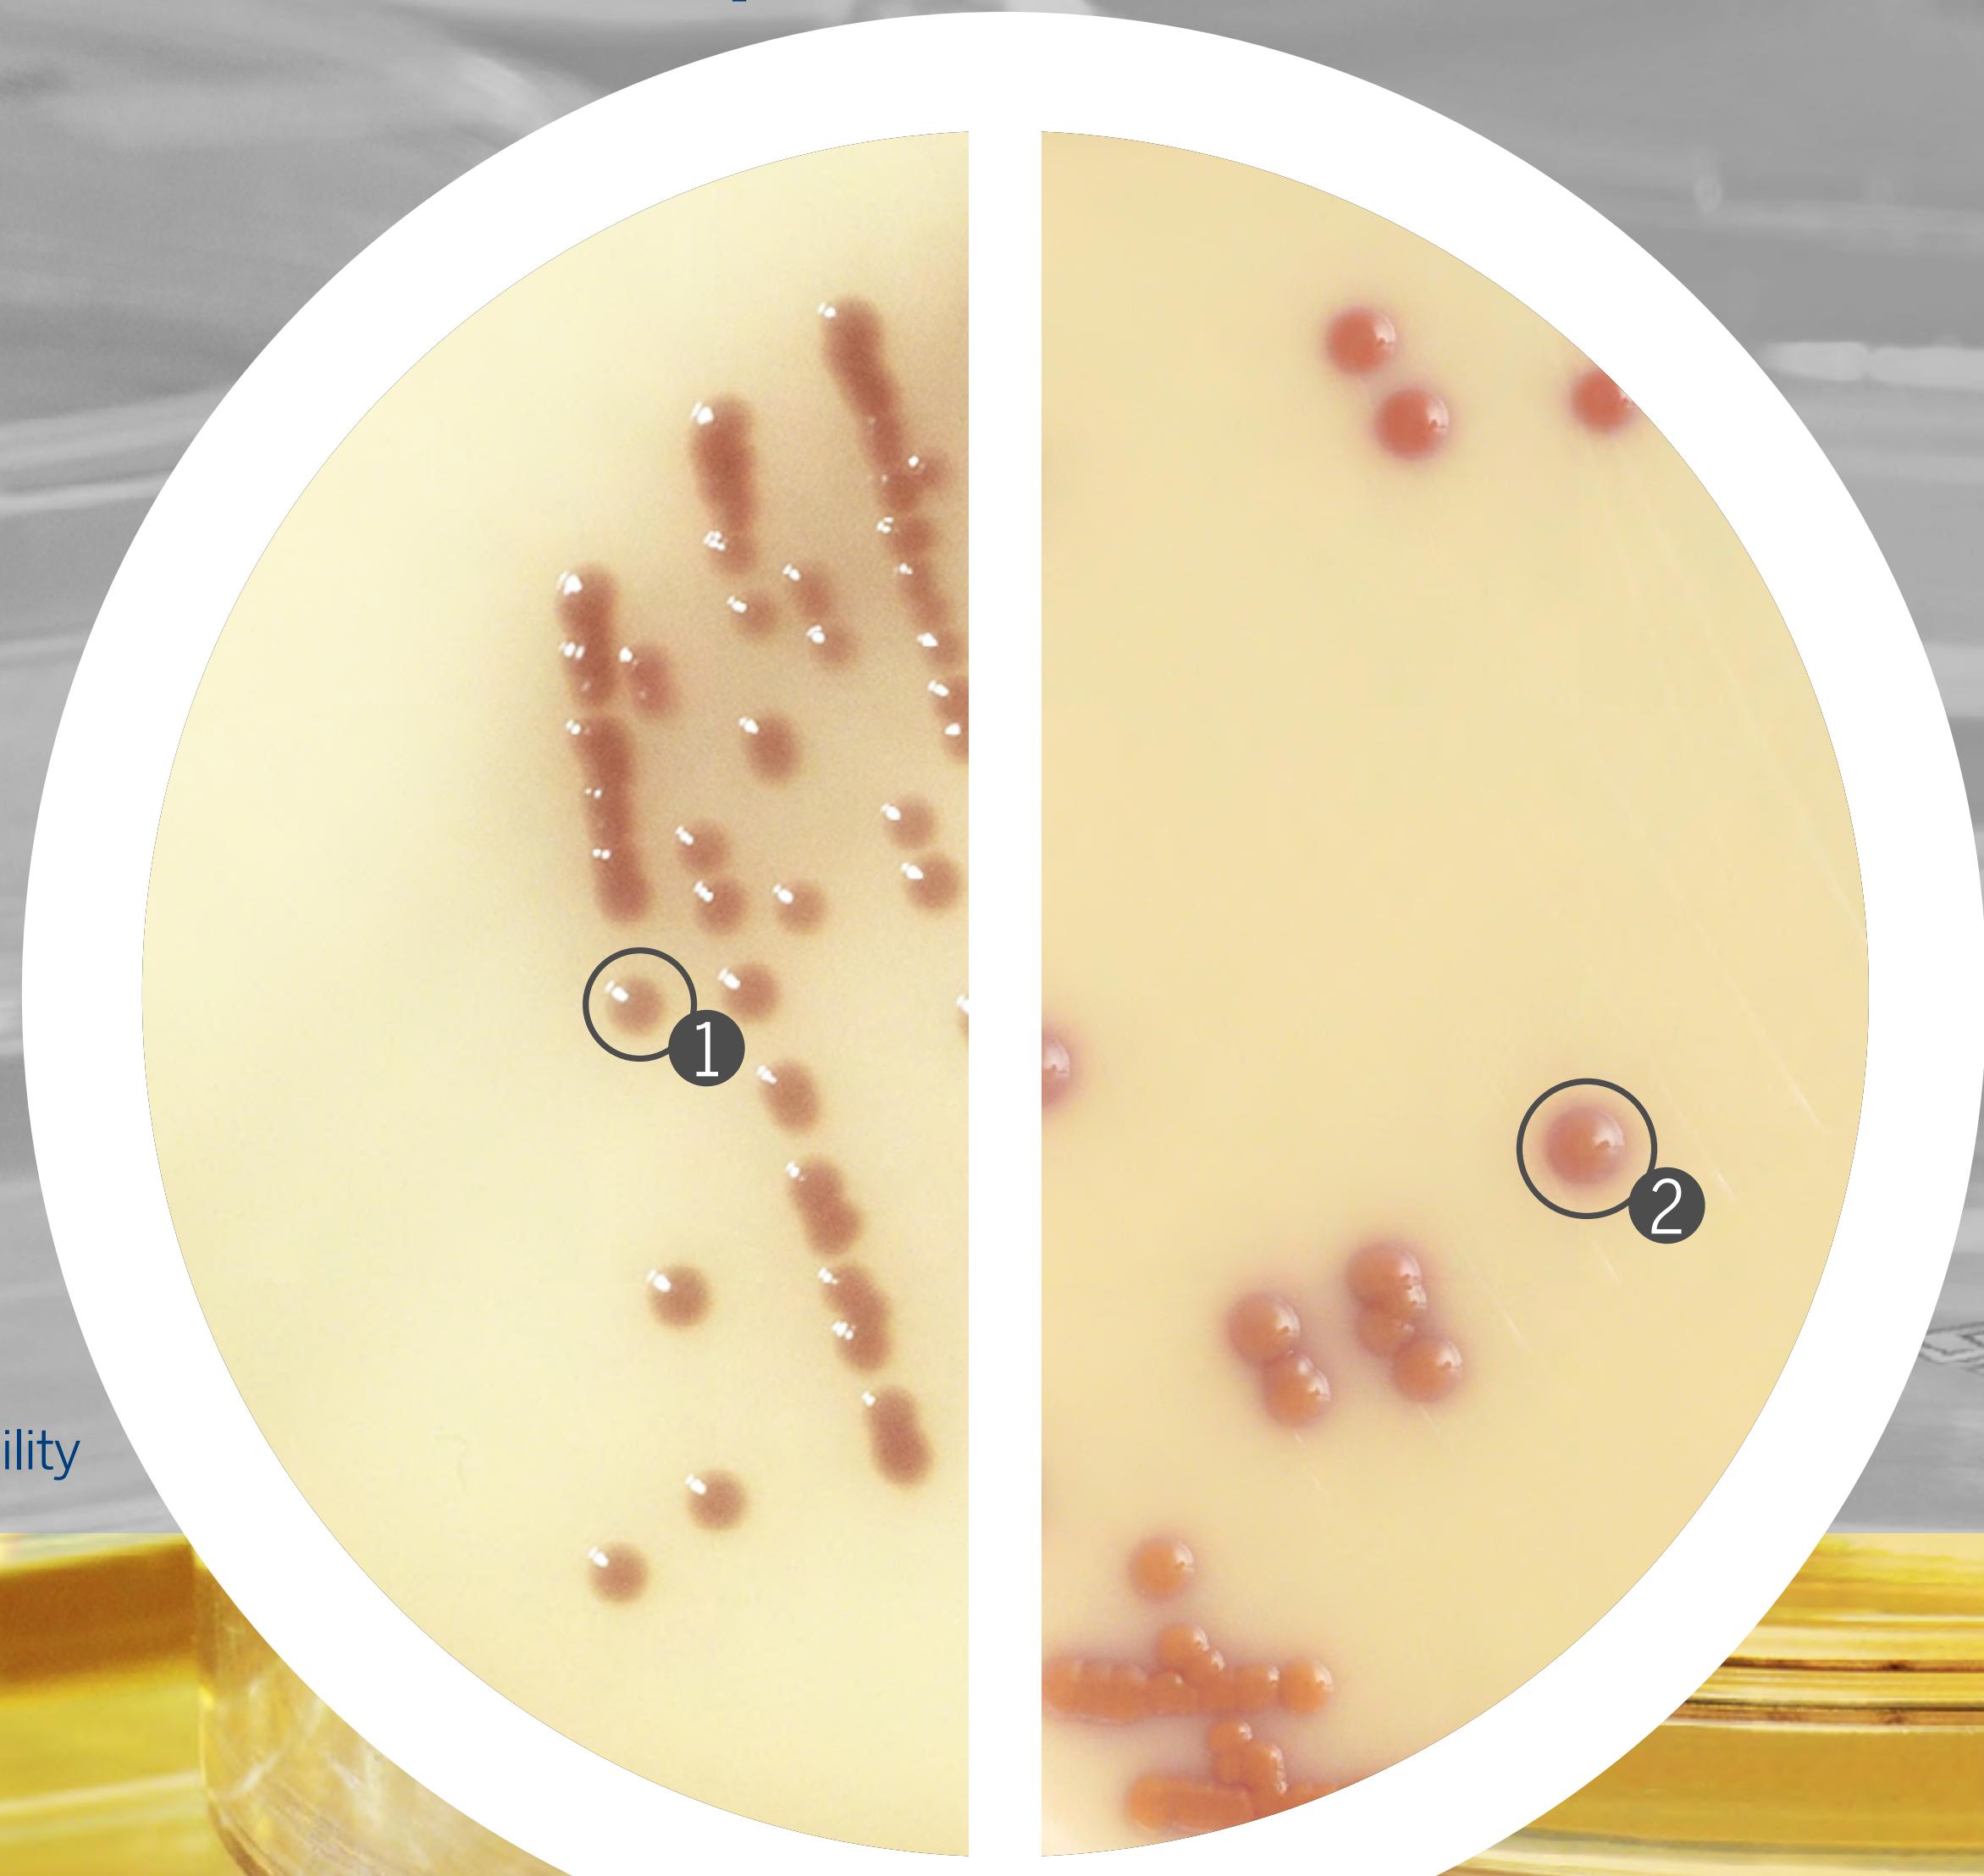

Combining *S.aureus* identification with direct detection of Methicillin resistance in 18-24 hours on nasal swabs, throat, perineum, wound, groin and positive blood culture specimens.

MRSA ① - *S.aureus* ②

18 hours

* Contact your local representative for availability

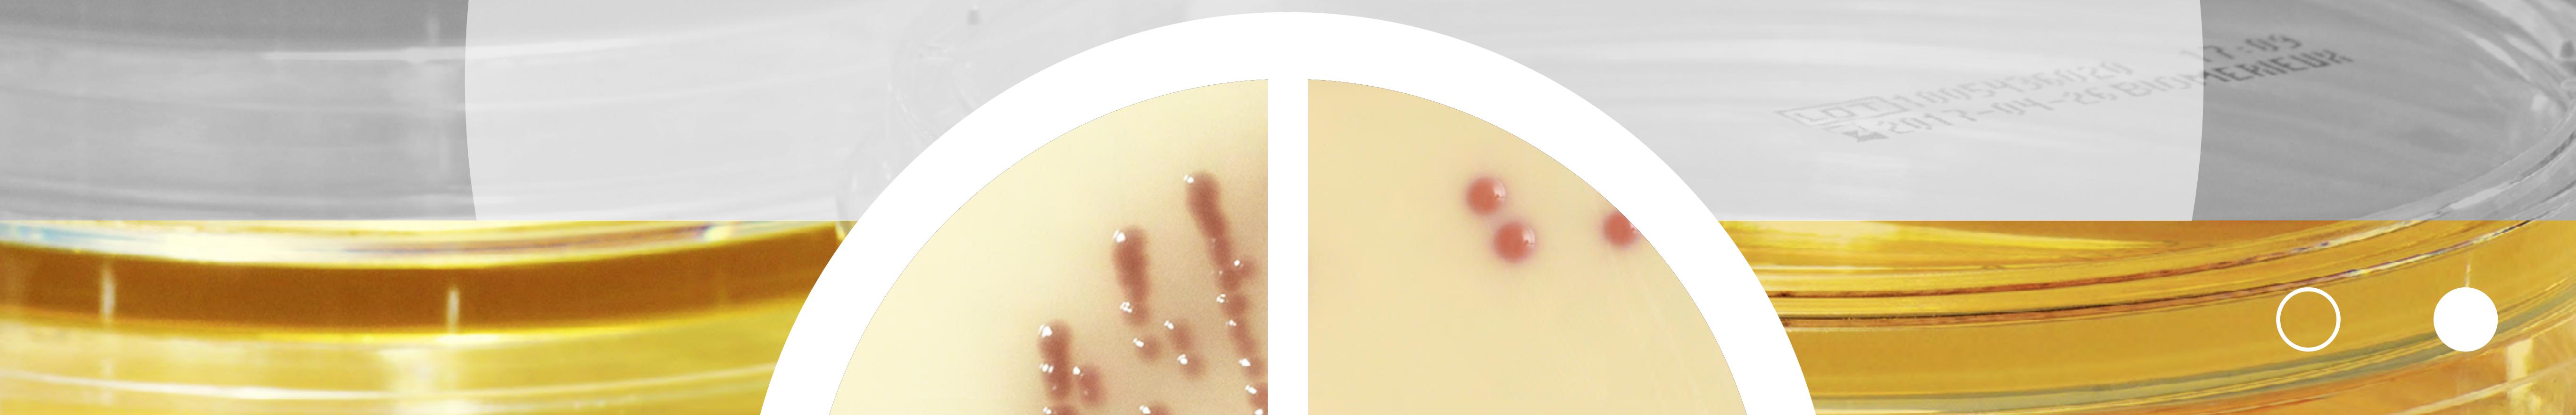

CHROMID® SMART MRSA/S.aureus agars

- Only 1 handling step to manage 2 media
- Simultaneous detection of *S. aureus* and MRSA in 18/24 hours
- Reduce costs through improved stock and waste management

For more information, consult the instructions for use.
