

GAME CHANGING EFFICIENCY WITH VERIFLOW® BOTTLESAFE™

Verify final filtration and rapidly detect common wine spoilers

Rapidly detect common wine spoilers in both red and white wines. The BOTTLESAFE pre-bottling screen helps to verify final filtration and ensure your carefully crafted wines are free of spoilage bacteria and yeast, protecting your vintage and your brand.

Reduce testing wait times for common wine spoilers to only 4-hours with a solution developed with wineries for wineries. BOTTLESAFE is a simple and affordable on-site screening solution that can be utilized by any size of winery and eliminate the need for costly outsourced testing.

BENEFITS OF VERIFLOW® BOTTLESAFE™ TESTING

- 
RAPID Onsite results in < 4 hours
- 
COST-EFFECTIVE A fraction of the cost of sending out for laboratory services
- 
SIMPLE Streamlined workflow and cost-efficient deployment
- 
SENSITIVE Equivalent detection limits to industry standards and methods used in service labs
- 
SPECIFIC Detect the most common wine spoilers pre-bottling
- 
SUSTAINABLE Operational efficiencies to save time and energy at the winery

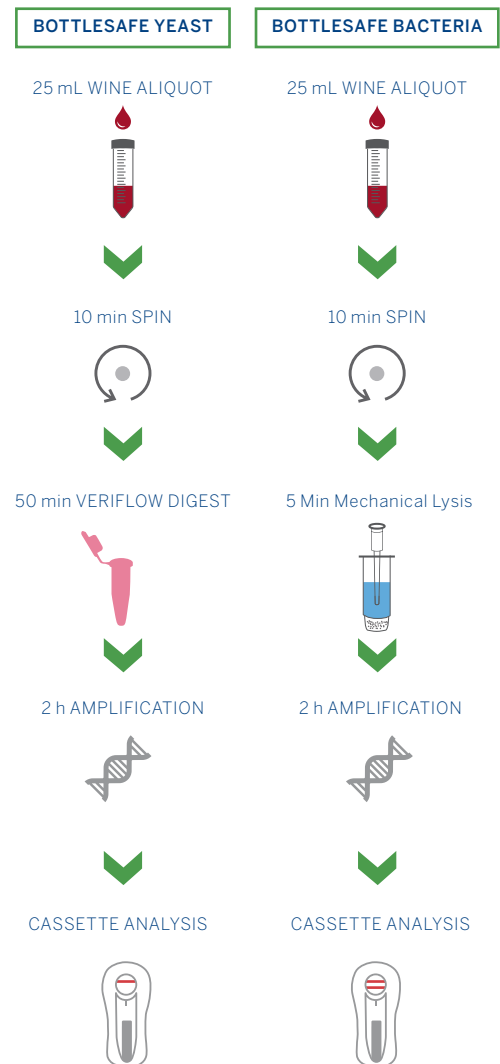

ORDERING INFORMATION

REF Number	Description
IS0622/IS5032	BOTTLESAFE Bacteria PCR Reagents A & B
IS0623	BOTTLESAFE Yeast PCR Reagent
IS6090	BOTTLESAFE Test Kit
414057	GENE-UP Lysis Kit
421713/ 9456TAHDUSA	Vortex and Lysis Rack Adapter
ISTC002	VERIFLOW Thermocycler
