GENE-UP® ENVIROPRO™ LISTERIA AND SALMONELLA
Sampling Efficiency for PROs

Introducing GENE-UP® ENVIROPRO™:
Simultaneous detection of *Salmonella & Listeria* Species from environmental swabs and food matrices

A multiplexed configuration that simultaneously detects *Salmonella* species and *Listeria* species from environmental swabs and various foods (dairy, dry fruits, nuts, seeds, berries, multi-component products e.g. RTE meals).

By combining these assays into one tube, it provides both cost-savings and a streamlined workflow to the end-user. The best-in-class workflow eliminates cumbersome DNA purification steps and reduces hands-on time.

Optimized Environmental sampling: One swab, one enrichment, one sample prep, two results!

Ultimately, GENE-UP ENVIROPRO is a game changer, improving overall sampling efficiencies and providing rapid data for quality decisions.

BENEFITS OF THE GENE-UP ENVIROPRO SALMONELLA & LISTERIA ENVIRONMENTAL WORKFLOW

SIMPLE	1 Universal Enrichment media, 1 test, 2 results
EFFICIENT	Double your throughput
PROFITABLE	Eliminates enrichment media production by half
RELIABLE	AOAC Performance Tested Method[SM]
RAPID	<10 minutes of hands-on sample prep
SUPPORTED	Full access to bioMérieux Scientific Expertise

HOW IT WORKS

Many flexible preparation options

One sponge for sampling both *Listeria* and *Salmonella*
24-28 hrs / 35°C ± 2°C

5 minute Lysis

PCR Tube

GENE-UP

Accurate Results

Confident Results in 2 Hours

ORDERING INFORMATION

IS1071	GENE-UP ENVIROPRO Kit	24 tests/kit
ISO374	Dehydrated Universal Enrichment Media	2kg
414057	GENE-UP Lysis Kit	192 tests/kit
419194	GENE-UP Tips	960 tips
ISO935	VSD Sample Tubes	24 tubes
